GENERAL

Introduction

The MEI Secondary Course Calendar provides information to students from grades 9 to 12, and to their parents/guardians, regarding the course planning and selection process. Students, in collaboration with their parents/guardians, are encouraged to use the Course Calendar to plan their next school year. The Course Calendar contains resources, descriptions of courses and their prerequisites, as well as the specific Graduation Program requirements. Students will select courses to fulfill their graduation requirements and to meet prerequisites for their future educational program and career interests.

It is our prayer and desire that God will guide and encourage you in this exciting and rewarding educational experience offered at MEI. If any questions arise, please do not hesitate to contact our Student Services Department.

Factors to Consider in Course Planning

Students are encouraged to consider the following factors in selecting courses:

1. Personal wellness: Having time and resources to live a balanced life (mentally, emotionally, intellectually, physically, socially, spiritually)
2. MEI grade promotion criteria
3. MEI Graduation Program requirements
4. MEI course pre & co-requisites
5. Individual academic strengths & weaknesses
6. Individual interest, ability and spiritual giftedness
7. Exploration of a variety of life / educational experiences
8. Future life & realistic career goals
9. Post-secondary options (with the consideration of personal wellness, goals, educational experiences, individual personality and strengths)
10. University / College entrance requirements

Helpful Resources

Parents

Discuss course selection options with your parents/guardians. Consider the factors listed above.

Course Calendar

This Calendar contains valuable information regarding course descriptions, post-secondary education and post-secondary scholarship and bursary awards.

Teachers

Talk to teachers, department heads, and coordinators to get more details about specific courses.

Counsellors

Work with a counsellor to clarify information or to help with overall course planning. Check out the post-secondary and career-related information available in Student Services.

Prayer

We encourage you to consider your choices prayerfully, seeking God's direction for you today and for the future.

Websites

Valuable information is available on the websites listed below. Click the title/hyperlink to access the website directly (online version).

Learning Tool

<https://schoology.com>

Learning management system acquired by PowerSchool (Nov. 2019) used by MEI Secondary to supplement instruction, provide resources, and report on progress (gradebook) as well as to communicate between students and teachers/school personnel.

BC Ministry of Education

<https://curriculum.gov.bc.ca/>

This site provides important information on the details of the BC Ministry of Education curriculum.

<http://studenttranscripts.gov.bc.ca>

Grade 12 students can set up their BCeID account to access the *Student Transcripts Service* to view final marks for courses taken in Gr. 10 & 11, to send transcripts to post-secondary institutions and also to authorize some schools to see their final and/or interim marks. Students cannot access this service without first setting up their BCeID account.

Career Planning & Post-Secondary Application Information

global.act.org

For registering and preparing for the American College Testing Assessment (ACT) exam, including test dates and registration deadlines. The MEI school number is **821068**.

www.bccat.bc.ca

The BC Transfer System provides information on transferring credits between post-secondary institutions.

www.collegeboard.org

Registering and preparing for Standardized Aptitude Testing (SAT) exam – The completion of SAT is usually required in the admission process to many American post-secondary institutions. You can register online. The College Board high school code number for MEI is **821068**.

www.educationplannerbc.ca

This useful site provides valuable information to help students plan their vocational journey, search programs and apply to multiple undergraduate post-secondary institutions throughout BC.

www.internationalstudent.com

This website helps international (Non-US citizens) students **who** want to study in the USA, US students **who** want to study abroad, and anyone interested in international education.

www.myblueprint.ca

This comprehensive education and career planner is used by MEI to help students explore, reflect and plan their vocational journey. For username and password, please see a CLE / CLC teacher, or a school counsellor.

www.schoolfinder.com

Wide-ranging information on college and university tuition, facilities, programs, admission requirements and deadlines across North America. Students will also find information on scholarships and financial aid, events and careers. Students can create an account and get a personalized dashboard with all their information saved for future explorations.

www.workbc.ca

All-inclusive website created by the BC provincial government for job seekers and employers. Students will be able to find out jobs available in BC, explore careers, access employment services and find out about required training and education including market information and industry.

www.jobbank.gc.ca/home

Portal created by the federal government linking you to jobs available throughout Canada, information regarding career planning and trend analysis.

Definitions

Academic Grade 12 Courses: Specific Grade 12 courses involving academic rigor that certain post-secondary institutions (PSI) require for general or program admission. Students must verify with the PSI which courses are considered "academic". Such courses may include:

Anatomy and Physiology 12, Calculus 12, Chemistry 12, English Studies 12, Foundations of Math 12, French 12, Physical Geography 12, 20th Century World History 12, Law Studies 12, Physics 12, Pre-calculus 12, and Spanish 12.

MEI academic grade 12 courses have a final assessment worth a substantial portion of the final grade.

Applied Design, Skills and Technologies (ADST): Courses that are recognized by the BC Ministry of Education have a practical, "hands-on" approach to learning. The Ministry of Education requires students to take a minimum of 4 credits of courses that qualify as ADST and/or Art Education. Courses that qualify as ADST have the symbol  beside their name on the course selection sheet as well as in this calendar.

Arts Education: The Arts Education courses strive to encourage and develop fine, musical and dramatic arts skills through engaged arts learning. The Ministry of Education requires students to take a minimum of 4 credits of courses that qualify as ADST and/or AE. Courses that qualify as AE have the symbol  beside their name on the course selection sheet.

Assessments: Assessments involve a wide variety of methods or tools that MEI teachers use to identify learning needs, measure competency acquisition, and evaluate students' progress toward meeting provincial learning standards.

Co-requisite: A course that must be taken concurrently to enroll in a similar course at a more advanced level.

Credit: A unit of measurement assigned to courses. A full semester course usually receives four credits (*110-120 hours of instruction*) and a half-semester (or term) course usually receives two credits (*55 to 60 hours of instruction*).

Extra-Curricular: Non-credited activities in which students can participate.

Graduation Program: Grade 10-12 MEI graduation and the New (2018) Ministry of Education requirements that apply to students who plan to graduate with a Dogwood Certificate.

Graduation Assessments: Assessments created by the Ministry of Education to evaluate numeracy and literacy competency. These are required assessments for graduation. There are three assessments:

- Grade 10 Literacy Assessment
- Grade 10 Numeracy Assessment
- Grade 12 Literacy Assessment

Upon completion and evaluation, a proficiency level will be indicated on the student's transcript but no credit value or percentage mark assigned.

Find more information on p. 8 in this calendar, as well in the [B.C. Graduation Program Policy Guide](#).

Personal Education Number (PEN): A nine-digit number assigned to each student by the BC Ministry of Education. This number is on the student's report card. Please do not confuse this number with the *Student / Pupil #* – a six or seven

digit number assigned for each student by our data management system (MyEdBC).

Post-Secondary Education: Education pursued after high school at a college, university, institute, trades program, Bible school, etc...

Prerequisite(s): Particular criteria (grade level or specific course completion or minimum final percentage in a course) that must be achieved prior to enrolling in a similar course at a more advanced level.

Pro-D: A Professional Development day when teachers attend seminars, conferences or workshops. Students do not attend school on Pro-D days.

Pupil Number: A six or seven-digit number assigned for each student by our data management system.

Student Services: Different locations in our school where students have access to academic, post-secondary, career, personal and mental health-related information and help. The Student Services department includes personnel providing counselling and academic guidance (room 226), learning assistance (room 208) and learning support (rooms 210 and 201).

Study Block: A non-credited period that students may qualify for. Students are encouraged to do homework during that time in their respective lounges or in the library.

Support Block: A block of time provided to some designated students during a semester in order to receive additional support from Learning Assistance and Learning Support at MEI. It is abbreviated **XSPBK** or **XSIEP-LD** 10, 11 or 12 on the timetable. Do not confuse this abbreviation with study block **XAT--12STU**.

List of Symbols

-  *Applied Design, Skills and Technologies Course*
-  *Arts Education Course*
-  *Application Form Required (Limited Enrollment)*
-  *Audition **or** Interview Required*
-  *Course Permission Slip from Instructor Required*
-  *Board/Authority Authorized Courses (Gr. 10, 11, 12) or Grade 9 Locally Developed Courses*
-  *Graduation Assessment*

Course Classifications

Academic Courses: Courses that have an academic rigor providing a solid foundation of learning that students can build on in post-secondary such as language arts, mathematics, modern languages, sciences and social studies.

Board/Authority Authorized Courses (BAA): Courses offered and developed by School Boards or Independent School Authorities to meet local needs and student interests. An unlimited number of BAA courses may be taken. A BAA course is identified by the code "Y" in front of its abbreviation, e.g., **YPHR-1A** Philosophy of Religion 11 known at MEI as Bible 11.

Elective Courses: Courses which a student will choose to complete their graduation requirements.

Extended Day Courses: Courses offered outside of the regular timetable (usually 7:00 am or 3:00 p.), e.g. Razzberry Jam, Leadership, etc.

External Credentials: Provincially authorized courses approved by the Ministry of Education and taught outside the regular school system. Examples include External Lifesaving 11 for Bronze Cross certification, Athlete 10, 11 or 12 for participating in a provincial or national team sport championship, Royal Conservatory of Music 10, 11 or 12 for a grade level achievement with a particular musical instrument, and ICBC Driver Education Course 11 for completing an ICBC-approved driver training course. Students receive external credits by submitting original documentation (such as a certificate) issued by the external organization to Mrs. Grauman in Student Services. For more information of qualifying programs see:

<https://www2.gov.bc.ca/gov/content/education-training/k-12/support/graduation/getting-credit-to-graduate/external-credentials>

Ministry (of Education) Authorized Courses: Curriculum that is developed by the Ministry of Education and is consistent throughout British Columbia. If the course code begins with the letter "M" it is a Ministry Authorized course. E.g. Literary Studies 10 (MLTST10), Food Studies 11 (MFOOD-11).

Required Courses: Specific grade 10, 11 and 12 courses which must be successfully completed to fulfill the Ministry of Education and MEI graduation requirements.

Grade Promotion

- Required courses that are not completed satisfactorily will normally be repeated in summer school or the following year/semester or through other distributed learning means.
- Students must pass Bible in order to return to MEI the following year.
- Students are permitted to take courses at their grade level only. The core subject offerings and elective classes at these grade levels are designed to give students the required courses they need and additional explorations in areas in which they may not have experience.
- Because our ultimate academic goal is to graduate our students, MEI Secondary School reserves the right to hold all graduation-requirement courses within the timetable of the student until they can prove they have completed the online version of the course.

Course Changes – Drop / Add Policy

The timetable is created based on students' original choices in February. Course changes may be possible, due to timetable conflicts and student/course suitability, during the first week of each semester.

- Course changes – drop/add will be possible until the first Friday of each semester.
- These changes may be possible provided classes are not being overloaded and there is minimal disruption to the rest of the student's timetable.
- Course changes requested after the deadline will be evaluated by Student Services and/or Administration on a case by case basis.

Study Block

- Study blocks are not permitted for Grade 9 and 10 students.
- Study blocks will not be given in lieu of online courses. If students, or their families, choose to enroll in an online course, that course will be in addition to the courses they are taking at the school, not in place of.

Study block eligibility for Grade 11 students:

- students taking an MEI extended day course totaling 4 credits.
- students who have 5 or more of the following grade 11 or 12 academic MEI courses in their current timetable: 20th Century History, B.C. First Peoples, Chemistry, Environmental Science, Foundations of Math, French, Law, Life Sciences, Literary Studies (English), Physical Geography, Physics, Pre-Calculus, and Spanish.

Study block eligibility for Grade 12 students:

- Any students in grade 12, who have a study class and would like to leave the school campus, must have formal permission from their parents signed at the beginning of the year. An MEI Study Block - **Parental Consent to be Excused** form is available at the Secondary office.
- Students do not decide which block their study block will be.

Study 11 (XAT--11STU) 0 credits

Prerequisite(s)/Co-requisite(s): This study block is only for grade 11 students who have 5 or more of the following grade 11 or 12 academic MEI courses in their current timetable: 20th Century History, B.C. First Peoples, Chemistry, Environmental Science, Foundations of Math, French, Law, Life Sciences, Literary Studies (English), Physical Geography, Physics, Pre-Calculus, and Spanish.

Study 12 (XAT--12STU) 0 credits

Co-requisite: Grade 12 students meeting MEI Graduation Requirements are entitled to take one study block in their grade 12 year. Students needing an additional study for exceptional circumstances must submit their request to the Principal for approval using an application form available from a school counsellor.

BC Second Language Information

As you are considering whether or not to carry on your education with a second language beyond grade 8, it is important to take into account the following information:

High School Graduation Requirement

A second language is **optional in grades 9 – 12** and is not required for high school graduation.

In order to take French or Spanish 10, 11 or 12 at MEI, students must have successfully completed French 9 or Spanish 9. Students can switch from French 8 and move on to Spanish 9 without prior Spanish knowledge.

University Admission Requirements

At this time a second language is **not** required for general admission to:

- ✓ British Columbia Institute of Technology
- ✓ Kwantlen Polytechnic University
- ✓ Trinity Western University
- ✓ University of the Fraser Valley
- ✓ University of British Columbia (Okanagan Campus only)
- ✓ University of Northern British Columbia
- ✓ University of Victoria
- ✓ Most other BC Colleges and Bible Schools.

A grade 11 second language is not required for students transferring to SFU or UBC after completing a full year of university transfer courses at UFV, KPU, TWU or UVic, etc.

A grade 11 second language is required for general admission to **Simon Fraser University** and **University of British Columbia (Vancouver Campus)**.

A grade 11 second language, or equivalent, is required for all students planning to complete a **Bachelor of Arts degree** at the **University of the Fraser Valley**. Students without an additional grade 11 language will need to complete a first year modern language course as part of their university studies.

A grade 12 second language is required for **all** students planning to complete a **Bachelor of Arts degree at the University of British Columbia (Vancouver Campus)** even if they are transferring from another post-secondary institution (PSI). Students without an additional grade 12 language must take a language as part of their university studies.

University of British Columbia no longer takes into account a “challenged” language 12 mark as part of calculating student average of their academic grade 12 courses for admission selection purposes. However, students wanting their modern language 12 (e.g., French 12 or Spanish 12) mark to count as one of their required academics, must take the language 12 as a classroom at MEI instead of challenging it.

Language Challenge Exams

Students can challenge a grade 11 or 12 modern language through our partnership with the Delta School District. Registration begins in November and the test is usually written during the last weekend of January in Delta, BC. The cost of this exam is approximately \$200.00. If you have any questions see the International program coordinator, Brenda Hansum. For more information please visit the following website:

<https://www.deltasd.bc.ca/schools/secondary/challenge-exams/>

Extra-Curricular Activities

Students are encouraged to get involved in extra-curricular activities. Getting involved is a great way to meet people, make friends and feel part of the MEI community. See the list of some of the extra-curricular activities MEI hopes to offer this year.

Athletic teams

MEI is dedicated to the purpose of providing a sound athletic program integrated with a Christian view of God, the world and competition. Our teams include basketball, cross-country, golf, hockey, soccer, swimming, tennis, and volleyball. For details regarding applications, try-outs and scheduling, please contact our Athletic Director, Mr. Rick Thiessen. For more information about the Hockey Academy, please contact Mr. Peter Hay. For new students transferring from another school who are interested in joining an athletic program regulated under *BC School Sports*, they must contact the MEI Secondary Athletic Director for an interview to evaluate eligibility.

Other Clubs and Opportunities

- Audio Visual Assistants
- Christmas Banquet Committee
- Grad Committee
- Intramurals
- Missions Teams
- Prayer Meetings
- Spring Production – Make-up Crew and Ushering.

MEI Graduation Requirements

Every student enrolled in Grade 10, 11 or 12 at MEI should attempt to meet the MEI graduation requirements below. By doing so, students will receive the ***Dogwood Diploma*** from the BC Ministry of Education. MEI Students must complete a minimum of **80** credits in grades 10, 11 and 12 credits. Below is the breakdown of required and elective credit requirements. Students should prepare well to ensure they get the credits they need to achieve their goals.

Required Courses (62 credits)

Bible 10 – Exploring The New Testament	(2 credits)
Bible 11 – Exploring Theology.....	(4 credits)
Bible 12 – Exploring The Christian Life	(4 credits)
B.C. First Peoples 12*	(4 credits)
Career-Life Education (CLE)	(4 credits)
Career-Life Connections (CLC)	(4 credits)
Literary Studies 10 (2 cr.) and	
Composition 10 (2 cr.) ➤	(4 credits)
Literary Studies 11	(4 credits)
English Studies 12 ➤	(4 credits)
A Mathematics 10 ➤	(4 credits)
A Mathematics 11 or 12	(4 credits)
An Arts Education 🎨 and/or An Applied Design,	
Skills, and Technologies ✂ 10, 11 or 12	(4 credits)
Social Studies 10.....	(4 credits)
Science 10.....	(4 credits)
A Science 11 or 12.....	(4 credits)
Physical Health Education 10	(4 credits)
TOTAL	(62 credits)

Elective Credits (18 credits)

Additional Grade 10, 11 or 12 courses (18 credits)

Overall Total (62 required cr. + 18 elective cr.) (80 credits)

*B.C. First Peoples 12 meets the Ministry of Education Graduation requirements for: a Socials Studies 11 or 12 course; an Indigenous Studies course; and an additional Grade 12 course.

Graduation Assessments ➤

As part of the graduation requirements, students in the [B.C. Graduation Program](#) will complete three provincial assessments. These assessments focus on the demonstration and application of **numeracy** and **literacy**. Upon the completion and evaluation of each assessment, a proficiency level will be indicated on the student's transcript but no credit value or % mark will be assigned.

More information about the B.C. graduation assessments can be found at: <https://curriculum.gov.bc.ca/provincial-assessment>

Numeracy Assessment 🏆

The **Grade 10 Numeracy Assessment** is a provincial assessment that assesses student proficiency in numeracy. It is a graduation requirement and students take the assessment after completing a grade 10 math. This Assessment focuses on the application of mathematical concepts learned across multiple subjects from kindergarten to Grade 10. It requires students to solve problems by using five numeracy processes (different ways of thinking and working): interpret, apply, solve, analyze and communicate. The numeracy processes are described in the [pre-assessment activities](#) and in the specifications.

Literacy Assessments 🏆

The **Grade 10 Literacy Assessment** is a provincial assessment that assesses student proficiency in literacy. It is a graduation requirement and students take the assessment in their Grade 10 year. This assessment evaluates student ability to use critical thinking and analysis to make meaning from a diverse array of texts. It also assesses the ability of students to communicate their ideas. The Grade 10 Literacy Assessment is not based on a particular course, but on learning across multiple subjects, from kindergarten to Grade 10.

The **Grade 12 Literacy Assessment** is a provincial assessment that assesses student proficiency in literacy. It is a graduation requirement and students take the assessment in their Grade 12 year.

- Instrumental Music: Concert Band 10 (4 cr.)

Other Courses

- Advanced Performance PE 10 (4 cr.)
- Core French 10 (4 cr.)
- Spanish 10 (4 cr.)

Extended Day Courses Options

Credits

Optional courses offered outside of the regular timetable (early morning or after school). Application form required.

- Apex: Student Leadership 10 (2 cr.)
- Computational Thinking and Information Systems 12 (4 cr.)
- Hockey Canada Skills Academy 10 (4 cr.)
- Junior Worship Leadership 10 (0 cr.)
- Outdoor Education 11 (4 cr.)
- Renaissance Singers (Vocal Jazz) 10 (2 cr.)

- Work Experience 12A (4 cr.)

- Yearbook 10 (4 cr.)

- Youth Work in Trades 11 or 12 (up to 16 cr.)

Optional courses offered outside of the regular timetable (early morning or after school). Application form not required; auditions in September.

- Bluesberry Jam (Jazz Band) 10 (2 cr.)

- Chamber Singers (Chamber Choir) 10 (4 cr.)

- Drumline 10 (2cr.)

Grade 11

Required Courses

A Bible 11 Course

- Bible 11- Exploring the New Testament (4 cr.)

An English Language Arts 11 Course

- Literary Studies 11 or
- Literary Studies 11 Honours

An Indigenous Studies course

- BC First Peoples 12 (4 cr.)

A Mathematics 11 Course

- Foundations of Math 11 **OR**
- Pre-Calculus 11 **OR**
- Workplace Mathematics 11

A Science 11 or 12 Course

- Chemistry 11 or
- Chemistry 11 Honours
- Environmental Science 11
- Life Sciences 11
- Physics 11
- Specialized Science 12-Agriculture Stewardship

Elective Course Options:

Applied Design, Skills and Technologies Courses

- Drafting 11 (4 cr.)
- Food Studies 11 (4 cr.)
- Interpersonal and Family Relationships 11 (4 cr.)
- Marketing and Promotion 11 (4 cr.)
- Robotics 11 (4 cr.)
- Textiles 11 (4 cr.)
- Woodwork 11 (4 cr.)

Arts Education Courses

- Art Studio 11 (4 cr.)
- Choral Music: Concert Choir 11 🎵 (4 cr.)
- Drama 11 (4 cr.)
- Film & Television 11 (4 cr.)
- Instrumental Music: Concert Band 11 🎵 (4 cr.)

Other Courses

- 20th Century World History 12 (4 cr.)
- Active Living 11 (Boys - formerly PE 11) (4 cr.)
- Active Living 11 (Girls- formerly PE 11) (4 cr.)
- Advanced Performance PE 11 🏊 🎵 (4 cr.)
- Core French 11 (4 cr.)
- Internet Applications 11 🖥️ (4 cr.)
- Law Studies 12 (4 cr.)
- Peer Tutoring 11 📖 (4 cr.)
- Physical Geography 12 (4 cr.)
- Spanish 11 (4 cr.)
- Study 11 (must have 5 academics to qualify) (0 cr.)

Extended Day Courses Options

Optional courses offered outside of the regular timetable (early morning or after school). Application form required.

- Apex: Student Leadership 11 📖 🏠 (2 cr.)
- Computational Thinking and Information Systems 12 📖 (4 cr.)
- Hockey Canada Skills Academy 11 📖 (4 cr.)
- Outdoor Education 11 📖 (4 cr.)
- Renaissance Singers (Vocal Jazz) 11 📖 🎵 🎵 (2 cr.)
- Secondary Teacher Assistant 12 📖 (4 cr.)
- Senior Worship Leadership 11 📖 (0 cr.)
- Work Experience 12A 📖 ✂️ (4 cr.)
- Yearbook 11 📖 🖥️ (4 cr.)
- Youth Work In Trades 11 or 12 📖 ✂️ (up to 16 cr.)

Optional courses offered outside of the regular timetable (early morning or after school). Application form not required; auditions in September.

- Chamber Singers (Chamber Choir) 11 🎵 🎵 (4 cr.)
- Drumline 11 🎵 (2 cr.)
- Razzberry Jam (Jazz Band) 11 🎵 🎵 (2 cr.)

Grade 12

Required Courses

A Bible 12 Course

- Bible 12- Exploring the Christian Life (4 cr.)

A Career Education Course

- Career Life Connections (4 cr.)

An English Language Arts 12 Course

- English Studies 12 **OR**
 - Advance Placement (AP) English Literature and Composition 12 📖 * (4 cr.)
- * Students taking AP will also meet requirement for English Studies 12

Elective Course Options:

Applied Design, Skills and Technologies Courses ✂️

- Child Development and Caregiving 12 (4 cr.)
- Drafting 12 (4 cr.)
- Entrepreneurship 12 (4 cr.)
- Food Studies 12 (4 cr.)
- Textiles 12 (4 cr.)
- Woodwork 12 (4 cr.)

Arts Education Courses 🎵

- Art Studio 12 (4 cr.)
- Choral Music: Concert Choir 12 🎵 (4 cr.)
- Drama 12 (4 cr.)

- Youth Work In Trades 11 & 12  ✱ (up to 16 cr.)
- Chamber Singers (Chamber Choir) 12  (4 cr.)
- Drumline 12  ✱ (2 cr.)
- Razzberry Jam (Jazz Band) 12  (2 cr.)

COURSE DESCRIPTIONS

Applied, Design Skills and Technologies (ADST) Education

✱ This symbol means that a course is recognized by the Ministry of Education as an Applied Design, Skills and Technology (ADST) Course and meets or contributes to the 4-credit ADST/Arts Education graduation program requirement.

Business Education

Entrepreneurship and Marketing 9 (MADEM09)

Prerequisite(s): None

In this course, students will understand the role of marketing in business, including research methods and product development. Students will also gain a working knowledge of accounting, for both business and personal use. Students will be encouraged to consider establishing their own business as a viable option in the future. The content will help develop the curricular competencies of defining success and what it means to be successful in the business world. Students will begin to understand the risks involved in the different stages of business development. As well, students will be exposed to various career opportunities available to them, as well as the general spectrum of courses in the Business Education Department.

Entrepreneurship and Marketing 10 (MADEM10) 4 credits ✱

Prerequisite(s): None

In this course, students will be introduced to the opportunities for entrepreneurship. They will be challenged to look at their own traits and compare them to the characteristics of entrepreneurs. Students will develop the competency of examining the barriers

that entrepreneurs face in introducing a product or service. In addition, we will explore the life cycle of a product or service from invention/innovation to the marketplace and ways to add value to an existing product or service. While being challenged to look at entrepreneurship as a career path, students will develop the competencies of researching different businesses while being able to define the goals of a business and to identify their target market.

Entrepreneurship 12 (MENT-12) 4 credits ✱

Prerequisite(s): Completion of Grade 11 or permission of instructor. Limited enrollment.

This course helps students gain an understanding of the entrepreneurial spirit and concepts in the context of starting a small business. Students will develop the competencies of prototyping a business idea, while working collaboratively with others. In doing so, they will be able to decipher through information their target market and how they will be able to re-work their idea for a product or service to fit their market's needs. These competencies will be developed primarily through a product/service launch within the class, as the class environment will mirror the structure of a corporation.

Marketing and Promotion 11 (MMAF-11) 4 credits ✱

Prerequisite(s): Students must also submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

This course is a practical, activity-based course that provides a framework for creative application of marketing concepts, operations and techniques applied to retailing and selling. Students will have the opportunity to learn how to be productive and motivate employees, including themselves. Students will be given not only the opportunity to come up with new promotional ideas but will also be given the support and resources as well. Other competencies that will be developed will be to define and understand their target market while receiving and reacting to feedback on their ideas through consumer response. A major part of this course is the operation of the school café and cafeteria.

Marketing and Retailing 12 (YMD--2A) 4 credits

Board Authority Authorized (BAA) Course

Prerequisite(s): MK 11 preferred. Students must also submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

This course will provide students with an opportunity to learn and develop marketing skills in a practical way critical in today's marketplace. Students will be taught how to create and implement marketing plans. They will also develop organizational skills through production of a marketing calendar and will also explore the effectiveness of developing different promotional materials. These skills will be fostered through working on practical projects in a team environment. Students will need to show initiative and leadership in starting, promoting and maintaining a successful operation with high ethical standards. Students may also work with a local business in developing a promotional campaign to help meet these business objectives.

Competencies that will be developed will be to learn how to define questions that needs to be solved and to come up with different possibilities to arrive at a solution.

Home Economics and Culinary Arts Education

Child Development and Caregiving 12 (MCDAC12)

4 credits ✖

Prerequisite(s): completion of Grade 11

This course is one of the most useful courses students will ever take at MEI. Through a service project students design, they will learn about child development and caregiving from 0 years of age to 18 years old. Surveys and social experiments will be conducted to gain insight into current trends and possible changes within the family structure. News items from around the world will be discussed and debated as to their possible impacts on the family unit. Baby simulators will be used for a 24-hour period to demonstrate the demands and responsibilities placed on a parent. Observations of pre-school children will authenticate theories of development as students interact with students of the MEI Pre-School. Along with these activities, communication skills, critical thinking, and personal and social responsibilities are developed. Everyone can benefit from this life preparation course.

NOTE: There is no final exam for this course, and no additional costs.

Food Studies 9 (MADFS09)

Prerequisite(s): None

This course will focus on kitchen basics, breakfasts and lunches. Students will learn many food preparation techniques and will prepare a variety of recipes. There will be opportunity for students to experiment with some recipes and design their own while taking into consideration the Canadian and First Nations Food Guides. Students will develop communication skills, as well as time management and personal and social responsibilities. They will also gain confidence in preparing food safely and using equipment properly.

Food Studies 10 (MFOOD10) 4 credits ✖

Prerequisite(s): None (Foods Studies 9 is an asset)

This course will deepen students' knowledge of food preparation and techniques, as well as expand students' understanding of nutrition and healthy living. Students will learn about kitchen safety and sanitation, the proper use of tools and equipment, and elements of sustainability within the food system. Students will prepare a variety of food products, such as snacks, meals, and baked goods. There will be opportunity for students to create their own recipes and test their own creations all the while gaining confidence in preparing food safely and using equipment properly.

Food Studies 11 (MFOOD-11) 4 credits ✖

Prerequisite(s): None (Foods Studies 9 or 10 are an asset)

This course will provide many opportunities to practice cooking and baking skills all the while applying the design process. Students will work with fruits and vegetables, rice and pastas, meats and alternatives in creating a variety of meals and baking products. They will develop meal-planning strategies and will learn to use resources effectively. There will be a soup competition and a final 3-course meal, which will be planned and made entirely by the students. In addition, the course explores concept and design in food by creating garnishes and gingerbread houses. The food system will be analyzed regarding its sustainability and environmental impact. Throughout the course, students will plan and bake for the school's café.

NOTE: Additional cost of \$25 lab fee.

Food Studies 12 (MFOOD12) 4 credits ✖

Prerequisite(s): None (previous Foods Studies courses are an asset)

This course is designed to build on culinary skills learned in Food Studies 11. The focus is the more intricate aspects of cooking, baking and aesthetics in foods, as well as the orchestration of entire meals. Cooking passion and confidence develop as students prepare a wide variety of healthy breakfasts, snacks, lunches and dinners of their own planning. One such project involves students playing the role of a Food Truck owner to create delectable items of their choice to 'sell' to the class. Throughout the course, students will plan and bake for the school's café as well as design other service projects. They will develop a deeper understanding of nutrition, healthy living, and the economic, environmental and cultural impact of food. This is a course students will find very beneficial as they move toward independent living.

NOTE: Additional Costs: \$25.00 lab fee.

Interpersonal and Family Relationships 11 (MIAFR11)

4 credits ✖

Prerequisite(s): Completion of Grade 10

Relationships tie us all together whether it is through school, work or family. This course delves into developing excellent relationships in all aspects of life, addressing questions such as: How do you know if she/he is the right person to marry? Why won't anyone listen to me? What is my body language saying? What do you do to end an unhealthy relationship? This is the most valuable course you will ever take! Morals, values and social skills in our society are taught from within the family unit. Our culture is dependent on good families for its propagation of thoughtful communities. How do we ensure a future of an excellent society in an ever-changing world? We must be purposeful in our actions and thoughts, then take the time to evaluate our culture and beliefs. To do this, students will design a service opportunity that could encompass individuals and families across the lifespan. This may involve journaling, surveys, interviews, or experiments of peers and others. Along

with these activities, communication skills, thinking critically, personal and social responsibilities are developed. Students will grow in maturity and understanding regarding relationships.

NOTE: There are no additional costs, and there is no final exam except life itself.

Textiles 9 (MADT-09)

Prerequisite(s): None

This course opens up a world of possibilities for expressing creativity. Students will begin with a small “stuffy” project to review sewing and pressing techniques, and then will construct a simple pattern, learning how to make necessary adjustments. Students will have the chance to explore, design and create a textiles product, learning many sewing skills along the way.

NOTE: Students will be required to purchase their own pattern, sewing supplies and fabric for their projects.

Textiles 10 (MTXT-10-2) 4 credits ✖

Prerequisite(s): None

This course provides an interactive environment where students combine creativity with sewing skills. It is for students who have no previous sewing courses or those who want to develop their sewing skills. The students' first project will be a hoodie where they will learn to sew more efficiently, successfully and creatively as they construct a professional-looking garment. A self-directed design project will allow students to explore and express their creative side as they produce custom-made clothing or other unique DIY textiles items.

NOTE: Students will be required to purchase sewing supplies and fabric for their projects.

Textiles 11 (MTXT-11) 4 credits ✖

Prerequisite(s): None

In this course, students will deepen competencies learned in previous clothing classes, or develop new skills if they have not yet taken textiles courses. Textiles 11 is open for registration for all students in grades 11-12. It is a project-based course, which makes it an exciting and hands-on place to be. Students will have a wide range of choice in their projects, with an emphasis on developing advanced skills and techniques. Students will apply the principles of design by exploring ideas, prototyping, testing, making, and sharing textiles items. They will explore the world of fabrics and fibres, technology and textiles, elements of design, and repurposing textiles.

NOTE: Students will be required to purchase patterns, sewing supplies and fabric for their projects.

Textiles 12 (MTXT-12) 4 credits ✖

Prerequisite(s): MTXT-11 or by permission of instructor

This is a fantastic course that enlightens students and enriches their skills to save money and create innovative projects.

Students will “Up-cycle,” taking existing items that would be headed to the landfills and reworking them into something fashionable and useable. With Textiles 12 focusing on learning advanced construction and finishing techniques, students will have the skills to create amazing products. There is also the wonderful opportunity to design and create costumes for the annual play production. Through these projects, students will develop both creative and technical skills with consideration towards design, ethics of textile production and consumption, and routine practices of the textile world. Their applied design skills will open a world of opportunities, both as a hobby and in the workplace.

NOTE: Students will be required to supply materials needed for up-cycling projects, and/or sewing projects.

Information and Communications Technology Education

Computational Thinking and Information Systems 12 (PSIAA12) 4 Credits

Prerequisite(s): Open to grade 10, 11 or 12. No prior computing experience is required. However, having taken or taking MEI IT course(s) in grade 9 to 12 is an asset. Students must submit a completed [application](#) form.

This course is designed by Trinity Western University (TWU) but facilitated and run at MEI by an MEI teacher as an extended day course every Monday from 3 to 5 pm following the TWU's second semester timeline. Successful students can be granted TWU first year (3 sem. hrs) transferable credits equivalent to **CMPT 113 – Introduction to Information Systems and Web Technologies**.

In this course, students will be introduced to the processing language through introductory game coding activities. Students will also gain a broad theoretical introductory understanding of computer information systems, computer history and base notation.

NOTE: Students taking this course are eligible for an additional spare.

Information Technology 9 (MADIT09)

Prerequisite(s): None

IT 9 introduces students to the basics of technology that are necessary to become proficient in today's ever-changing world. The programs and content taught throughout the course are designed to help students become successful students, in high school and university, as well as successful employees and employers. Students will learn how to use Microsoft Word and Excel effectively and will have fun exploring the world around them with digital cameras. Students will also learn how to manipulate photos and create graphics using Adobe Photoshop and Lightroom. Finally, students will be allowed to choose a technology they want to know more about and work on that every Friday.

NOTE: No final exam

Internet Applications 11 (YCAIS1A) 4 credits

Prerequisite(s): None

Students interested in web design and in learning how to work collaboratively as a team member will enjoy this course. Students will create websites using many different design techniques and will practice web design by maintaining and creating within the award winning MEI website. Students will work in a business climate classroom and will also create a web portfolio. Outside businesses have the opportunity to “hire” students for their particular website needs. Additional topics and skills include: the art of taking a good photo, proper use of the digital camera, tricks for web photos, using animation design, Dreamweaver editor, Adobe Photoshop, Javascript, streaming audio and video, php, mysql, frames, dynamic and interactive site design.

NOTE: No Final Exam

Internet Applications 12 (YCAIS2A) 4 credits

Prerequisite(s): YCAIS1A

This course has been developed by MEI to support and encourage students to explore the richness and diversity of various cultures through the medium of web page design. Students will learn to use digital cameras as recording tools and computers as editing tools. Today, new and exciting careers are being pioneered by those with the knowledge and skills to use information technology creatively. Whole industries are emerging around the information technology revolution. Students will explore curricular themes, develop project proposals and research topics of community value or personal interest. They will write advanced web pages and edit data to produce finished web pages or a working Internet site. This course focuses on scripting, programming, developing search strategies for new technology, publishing skills, and serving information on a web server. In addition, the topic of web ethics will be covered.

NOTE: No Final Exam

Web Development 10 (MWBDV10) 4 credits

Prerequisite(s): None

This ministry course gives students the opportunity to learn computer skills as they are integrated throughout our society today. The course has a core component of internet exploration as students learn, design, and create a fully functioning live website including a functioning online store. Students learn basic html and stylesheet coding. Students learn how to manipulate digital images through Adobe's Photoshop. Students take creative risks in generating ideas and add to others' ideas in ways that enhance them through teamwork and collaboration. This is a practical hands-on course where students learn by “doing” rather than listening.

Yearbook 10 (YCCT0A) 4 credits

Prerequisite(s): Students must also submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

This course focuses on the development of photography and journalism skills needed to produce a yearbook and several books or booklets including the secondary yearbook, elementary yearbook and possibly the spring supplement. Students take creative risks in generating ideas and add to others' ideas in ways that enhance them and they will develop the following skills: photography, selling and developing ads, using Adobe Photoshop, developing themes for yearbook, choosing and recording significant world events, designing single and double page spreads, developing photo stories, writing headlines, captions, editing, teamwork, and record keeping.

NOTE: This is an extended day course offered outside the timetable. In addition, students must be prepared to give some out-of-school time to take photo assignments, sell ads and finish projects. Being able to meet deadlines is a must.

Day and time of the course will be decided as a class at the beginning of the school year.

Yearbook 11 (YCCT1A) 4 credits

Prerequisite(s): Students must also submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

This course focuses on the development of photography and journalism skills needed to produce a yearbook and several books or booklets including the secondary yearbook, elementary yearbook and possibly the spring supplement. Students take creative risks in generating ideas and add to others' ideas in ways that enhance them and they will develop the following skills: photography, selling and developing ads, using Adobe Photoshop, developing themes for yearbook, choosing and recording significant world events, designing single and double page spreads, developing photo stories, writing headlines, captions, editing, teamwork, and record keeping. Editors will make a step-by-step plan for production and carry it out, making changes as needed.

NOTE: This is an extended day course offered outside the timetable. In addition, students must be prepared to give some out-of-school time to take photo assignments, sell ads and finish projects. Being able to meet deadlines is a must.

Day and time of the course will be decided as a class at the beginning of the school year.

Yearbook 12 (YCCT2A) 4 credits

Prerequisite(s): Students must also submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

This course focuses on the development of photography and journalism skills needed to produce a yearbook and several books or booklets including the secondary yearbook, elementary yearbook and possibly the spring supplement. Students take creative risks in generating ideas and add to others' ideas in ways

that enhance them and they will develop the following skills: photography, selling and developing ads, using Adobe Photoshop, developing themes for yearbook, choosing and recording significant world events, designing single and double page spreads, developing photo stories, writing headlines, captions, editing, teamwork, and record keeping. Editors will make a step-by-step plan for production and carry it out, making changes as needed.

Being able to meet deadlines is a must. Day and time of the course will be decided as a class at the beginning of the school year.

Technology Education

Drafting 9 (MADD-09)

Prerequisite(s): None

In this intensive, hands on course the students will be equipped with the knowledge and skills necessary for creating a basic 2D working drawing using AutoCAD. The course will emphasize the development of drafting skills and students will use AutoCAD to complete their formal drawings. Students will complete dimensioned orthographic drawings, design a simple house plan and be introduced to 3D modelling.

Drafting 10 (MTDRF10) 4 credits ✖

Prerequisite(s): MADD-09 is an asset.

The intent of this program is to focus on the development of drafting skills. Drafting is truly a universal language. This curriculum is designed to promote understanding and application of this graphical language used in technical drawings. The computer program AutoCad will be utilized to develop these skills. Students will communicate their designs using both 2D and 3D wireframe and solid model drawings. They will complete full working drawings in 2D and 3D along with taking measurements of rooms and pieces of furniture and drawing them using AutoCAD.

Drafting 11 (MTDRF11) 4 credits ✖

Prerequisite(s): None. MTDRF10 is an asset.

This course will focus on architectural design and mechanical drafting. The students will be introduced to construction methods, as well as theory of residential design. During the course, students will become designers in a "mock" design firm. They will be assigned various projects where they will be designing floor plans, custom furniture, and millwork. They will then present their designs along with samples and renderings showing what a client might expect from the project. The second half of the course will deal with drafting mechanical objects using various formats and conventions such as dimensioning, section and auxiliary views, surface developments

and intersections as well as fastening devices. Students will be introduced to AutoCAD along with several other drafting and design programs in this course.

NOTE: There will be a \$50 fee to cover materials used with the CNC and modeling as well as for printing full-size blueprints.

Drafting 12 (MTDRF12) 4 credits ✖

Prerequisite(s): MTDRF10 or instructor's permission.

This course expands on the Drafting 11 course by exploring architectural residential design and mechanical drafting in greater detail and providing an opportunity for thorough application. Students will complete a full set of house plans. Students will learn how to do the following: use appropriate drafting and design terminology; select, present, and respond to drawings and design solutions in a variety of suitable visual formats and media; apply drawing standards and conventions; and create complex concept, presentation, and detail drawings. Students will also learn to identify and develop the components of working drawings including a bill of materials and schedules. Students will be introduced to the CNC, a computerized router in the woodshop, where they will learn how to program this machine and make pieces out of wood and various other materials from a design in AutoCAD.

NOTE: There will be a \$50 fee to cover materials used with the CNC and modeling as well as for printing full-size blueprints.

Robotics 11 (MTROB11) 4 credits ✖

Prerequisite(s): None

This is a personalized course for students who want to explore the exciting field of Electronics & Robotics. Students will explore and assemble components on a breadboard and circuit board. With a personalized learning program, students will be immersed in real robotic programming projects and gain real world skills. Students can compete in a number of fun and challenging electronic projects. Robotic projects will be constructed to allow students to participate in various competitions or showcases.

Woodwork 9 (MADW-09)

Prerequisite(s): None

This course lays a solid foundation for entry into other advanced courses such as Woodwork 10 or Woodwork 11/12. In this course, students will develop safe and proper handling skills of various materials, equipment, stationary machinery, and hand and power tools in the shop. Students will also develop knowledge of wood in historical and cultural contexts, locally and throughout Canada. Through the completion of the first project, students will learn and apply sketching, scale drawing, modeling, design introduction, material lists, wood calculations, and construction. In addition, students will be introduced to some basic principles and terminology of good design and will be assigned the task of communicating and completing a small project using a design they have created.

NOTE: The Woodwork Fee is \$50 plus additional costs for smaller projects if time permits.

****Grade 12 students who have completed Woodwork in at least 3 of their 4 years of High school may create a project of their own design within specific guidelines/parameters in Woodwork 12.**

Woodwork 10 (MWWK-10) 4 credits ✖

Prerequisite(s): Previous woodwork courses will be an asset.

This course primarily involves skill development in cabinet construction and furniture building. Students will learn various styles of cabinet building and learn to identify and make various wood joints. Early in the course, the learning environment will focus on designing solutions for real-world problems in small groups and learning AutoCAD and SketchUp to create drawings and designs for projects. Shop, machine, and tool safety will continue to be emphasized. Students will have the opportunity to apply their learning when designing, planning, and constructing projects within certain design parameters and controls. In this process, students will be required to plan the project, which will include material calculations, scale drawings, pricing, and a procedures list. The applied construction skills will be developed via two main start-to-finish cabinet and furniture projects. These projects will include milling the wood, joining, assembling, staining and finishing their project. Through the course, students will develop knowledge of wood in historical and cultural contexts, locally and throughout Canada.

NOTE: The Woodwork Fee is \$75 plus additional costs for smaller projects if time permits.

****Grade 12 students who have completed Woodwork in at least 3 of their 4 years of high school may create a project of their own design within specific guidelines/parameters in Woodwork 12.**

Woodwork 11 (MWWK-11) 4 credits ✖

Prerequisite(s): Previous woodwork courses will be an asset.

This advanced course will require the students to design, plan, and construct projects within very clear design parameters, as well as projects of their own choosing from start to finish. Students will create projects based on how many woodwork courses they have completed in high school. Shop safety will continue to be emphasized. Early in the course, the learning environment will focus on designing solutions for real-world problems in small groups and learning or advancing their skills in AutoCAD and SketchUp to create drawings and designs for projects. Students will need to understand, identify and select the appropriate wood product for structural and aesthetic applications. Students will also learn how to create production jigs and how to organize and work on an assembly line. Working safely and as a team will be further enhanced during this course. Students will also develop knowledge of wood in historical and cultural contexts, locally and throughout Canada.

*The Woodwork Fee is \$100 (base) plus additional costs that are project dependent.

****Grade 12 students who have completed Woodwork in at least 3 of their 4 years of high school may create a project of their own design within specific guidelines/parameters in Woodwork 12.**

Woodwork 12 (MWWK-12) 4 credits ✖

Prerequisite(s): MWWK 10 or Instructors permission

This course is designed for students with advanced carpentry skills and who intend to pursue a career in this industry. Early in the course, the learning environment will focus on designing solutions for real-world problems in small groups and learning or advancing skills in AutoCAD and SketchUp to create drawings and designs for projects. Students will be introduced to the CNC a computerized router in the woodshop where they will learn how to program and make pieces out of wood and various other materials from a design in AutoCAD. During the first half of the course, students will design and learn to construct small structures for off-campus sites. Topics and skills covered during this section include framing, window and door installation, interior and exterior finishing along with some basic electrical and plumbing. Students can expect to design and work on special projects that might involve building sheds, playhouses, doghouses, greenhouses, and/or other small structures. Shop safety will continue to be emphasized. Students will also develop knowledge of wood in historical and cultural contexts, locally and throughout Canada. During the second half of the year, students will be allowed time to pursue interests they may have in furniture building or cabinet making. Students will create projects based on how many years they have taken woodwork.

*The Woodwork Fee is \$100 plus additional costs that are project dependent.

****Grade 12 students who have completed Woodwork in at least 3 of their 4 years of high school may create a project of their own design within specific guidelines/parameters in Woodwork 12.**

Arts Education

 This symbol means that a course is recognized by the Ministry of Education or the Board as an Art Education course. It also identifies courses in grades 10-12 that meet the ADST/AE graduation program requirement.

Drama

Music 9 (Drama & Choir) (MMU--09)

Prerequisite(s): None

This locally developed course is for those especially interested in music and/or drama. Students will be introduced to the basics of drama and singing as a means of communication. Students will be applying their knowledge and skills in short drama presentations including improvisation, creative movement, monologues and skits. They will also learn basic singing skills to develop strong vocal qualities for effective communication. Students will learn how to appreciate music by listening to and analyzing all styles of music, and watching videos of Broadway musicals. Students work towards developing competencies in leadership, teamwork and relational communication (being able to express opinions, views and observations in a public appropriate manner). **All music/drama students are required to be a member of the Christmas Concert Mass Choir and perform on the MEI Christmas Concerts** (see *School Calendar for date*). It is recommended that all students attend the annual MEI Spring Production. Students will also go one evening outing to see a professional production.

NOTE: Additional cost for field trip approximately \$40-50.

Drama 10 (MDRM-10) 4 credits 🗣️

Prerequisite(s): None

This class is designed for drama enthusiasts desiring to improve public communication skills. The course covers the many facets of the dramatic arts, including characterization and role-playing, blocking, creative movement, choreography, voice production, stagecraft, and stage lighting. The main emphasis will be on communication through mime, improvisation and dramatic skill building. This is a collaborative course, where students are expected to develop skills in leadership, creativity and teamwork in various size groups of students. Projects require building communication and relational skills, while expressing personal experiences and opinions daily in class. All drama students are required to attend the Spring Production. This course requires attending a professional drama/musical production, outside of class time with the class.

NOTE: Additional cost of approximately \$40-50 to cover field trip transportation and tickets

Drama 11, 12 (MDRM-11, MDRM-12) 4 credits 🗣️

Prerequisite(s): XLDC09MUD, MDRM-10, MDRTC11 or permission from the teacher

This course is designed to give students a reasonable level of competency in all essential components of Acting. Students will enhance their theatre skills through projects including, but not limited to: pantomime, improvisation, monologues, choreography, blocking, lighting, and vocal production/accents. This is a collaborative course, where students are expected to demonstrate leadership ability, creativity and teamwork in various size groups of students. Projects require strong communication and relational skills, while expressing personal experiences and opinions daily in class. This course requires attending a professional drama/musical production outside of class time with the group. Furthermore, all theatre students are expected to take part in some capacity in the Spring Production.

NOTE: Additional cost of approximately \$40-50 to cover field trip transportation and tickets.

Film & Television 11 (MDFT-11) 4 credits 🗣️

Prerequisite(s): none

The Film & Television 11 course teaches students to analyze the ways in which moving images convey meaning through movement, sound, image, structure, and form and then put these principles into their own productions. Students will make a number of short films during the year as well as participate in live news broadcasts and other live streaming events. Students will learn to improvise to inspire creativity and innovation and students can choose to do this in front of the camera, behind the scenes, or both. Students will learn how to use cutting-edge videography equipment including microphones, cameras, dollies, switchers, mixes, tele-promoters, lighting, editing software (Adobe Premier, Adobe After Effects, DaVinci Resolve) and much more. Finally, students will watch and reflect on a variety of film and television productions and use the course as an opportunity to add their voice to the world around them.

Film & Television 12 (MDFT-12) 4 credits 🗣️

Prerequisite(s): None

The Film & Television 12 course teaches students to bring stories to life through the visual arts. Students will plan, produce, record, and refine moving images individually and collaboratively and make a number of short films during the year as well as participate in live news broadcasts and other live streaming events. Student can choose to focus on working in front of the camera, behind the scenes, or both. Students will learn all production phases of digital filmmaking including; editing software (Adobe Premier, Adobe After Effects, DaVinci Resolve), Adobe Photoshop, as well as advanced techniques such as green-screening and motion graphics. Students will examine the influences of social, cultural, historical, environmental, and personal contexts in film and television and learn how to write and format a movie script, storyboard, and use advanced camera techniques and composition. Finally, students will watch and reflect on a variety of film and television productions and use the course as an opportunity to add their voice to the world around them.

Music - Choral

Music 9 (Drama & Choir) (MMU--09)

Prerequisite(s): None

This locally developed course is for those especially interested in music and/or drama. Students will be introduced to the basics of drama and singing as a means of communication. Students will be applying their knowledge and skills in short drama presentations including improvisation, creative movement, monologues and skits. They will also learn basic singing skills to develop strong vocal qualities for effective communication. Students will learn how to appreciate music by listening to and analyzing all styles of music, and watching videos of Broadway

musicals. Students work towards developing competencies in leadership, teamwork and relational communication (being able to express opinions, views and observations in a public appropriate manner). **All music/drama students are required to be a member of the Christmas Concert Mass Choir and perform on the MEI Christmas Concerts** (see *School Calendar for date*). It is recommended that all students attend the annual MEI Spring Production. Students will also go one evening outing to see a professional production.

NOTE: Additional cost for field trip approximately \$40-50.

Choral Music: Concert Choir 10, 11, 12 (MMUCC-10, MCMCC-11, 12) 4 credits each year 🗣️ 🎤

Prerequisite: Audition (during June of previous school year; beginning of September for new students)

The Concert Choir 10, 11 and 12 performs challenging choral literature in a wide range of styles, from Renaissance to Contemporary. While training levels of musical theoretical concepts and singing ability, the course has the goal of developing competencies in leadership, teamwork, and relational communication, and the group strives for a high calibre of aural and visual performance as a team. The choir takes on many service opportunities to perform in local churches and in-school outreach programs. This course will prepare students to make an effective contribution to MEI churches, choirs and worship teams, as well as allow students to become involved in other community singing experiences after completing their secondary studies. This course often includes a trip/trips to Vancouver to attend a Vancouver Chamber Choir rehearsal and concert (partially sponsored by VCC donors).

Every second year we do a major tour with Concert Band and Concert Choir, (Razzberry Jam and Chamber Singers). Costs for this tour can range from **\$2000-2500+** per student (depending on location). Fundraising opportunities will be presented during the year to defray some of the costs. The tour happens in spring and lasts for approximately 7-8 days. It usually includes a major festival, school or community/cultural performances and social events along the way. Students will be responsible for homework and assignments missed while away from school. The tour, as well as all concerts and events during the year, is required of all members of the group.

Alternate year to the major tour could include a trip to the "CAMS" or "ACSI" festival somewhere in Canada/Western US, or one of a number of national festivals, and other more local festivals. Cost should be expected for these years as well for festival fees, transportation and accommodation, although not as high as our major tour expenses which happen every second year. Costs for alternate year tours will vary depending on whether we do shorter trips or one longer festival (\$450-\$550). Fundraising opportunities may be available through parent led committees.

NOTE: All students must have the standard *MEI performing arts uniform. Other costs: \$15-20 for the Vancouver Chamber Choir rehearsals/concert. Students without a personalized MEI Choir folder will have an additional cost of approximately \$20 (folder to be provided by the instructor).

Choral Music: Chamber Choir (Chamber Singers) 10, 11, 12 (MMUCH-10, 11, 12) 4 credits 🗣️ 🎤

Prerequisite(s): Audition (September)

Co-requisite(s): Enrolled in an MEI Performing Arts Choral or Band class.

This extended day course is for those who excel in vocal music. This class strives for excellence and has many awards to illustrate their past successes. Approximately 8-18 singers are admitted into this group, depending on the year. Focus is given to developing technical competencies in vocal intonation, phrasing, blend, balance, refinement of tone quality, enunciation and dynamics. Leadership, creativity and communication are essential skills to develop for this group. There is a high level of relational communication and accountability between group members to achieve a high calibre of visual and aural communication to audiences and each other. This course covers a wide range of literature, from Renaissance to Vocal Jazz based on the festival expectations for the year. The Chamber Singers group takes many opportunities to perform at festivals, churches, and a variety of venues throughout the year. They have regularly been on TV and sing the anthems annually at a Vancouver Canucks game. The 3-4 weeks leading up to the Christmas break are probably the busiest. This is why students must sign an agreement form, which outlines the coming year, with expectations, commitments and expenses in detail. Rehearsals are mandatory, meeting two mornings per week at 6:55 a.m. and students are expected to attend additional rehearsals when necessary.

NOTE: Extra costs should be expected for festival fees, transportation and accommodation. Every second year (opposite year of the large Concert Choir/Concert Band tour) we attend the Lionel Hampton International Jazz Festival in Idaho, which generally costs around \$500-600. All students must have the standard *MEI performing arts uniform. This is an extended day course.

Choral Music: Vocal Jazz (Renaissance Singers) 9, 10, 11, 12 (XLDCB-09, MMUVJ-10, MCMJV-11, MCMJV-12)

2 Credits 🗣️ 🎤

Prerequisite(s): Audition (September)

Renaissance Singers specialize in small ensemble singing in a variety of styles. This course is for students in grades 9-12 who want to excel in music performance, especially in preparation to sing in the MEI Chamber Singers, with a more relaxed commitment and busyness as the senior Chamber Singers. Approximately 24-30 students will be admitted into the group. The group will explore contemporary and traditional styles with the addition of visual performance and choreography, and a 'Glee Club' flair. The group develops on-stage communication and relational collaboration to accomplish a high calibre of musical performance. Rehearsal attendance is mandatory. Renaissance will perform in a 2 or 3 Christmas concerts including the West Coast Christmas Show, the MEI Christmas Concerts, and MEI Spring Concert (in May); as well as attend a festival weekend, such as the Good Noise Gospel Choir "Gospel Experience"

and/or Kiwanis Music Festival in April each year. Cost per student: \$200 - \$500 depending on the year. All students must have a performance uniform for this group (black dress shirt, black dress pants and black dress shoes). Own cost.

NOTE: This is an extended day course. Class meets Thursday mornings at 6:55 a.m. and every second Monday morning at 7:25 am.

Music - Instrumental

Drumline 9 (XDR 09)

Extended Day Course

Co-requisite(s): Band 9; Audition

Drumline is required of percussionists who are enrolled in the MEI Music program. This class gives percussionists an opportunity to enhance their drum rudiments skills and cadence playing.

NOTE: Drumline meets once a week outside of the timetable for 120 minutes.

Drumline 10, 11, 12 (YVPA-0B, YVPA-1B, YVPA-2B) 2 credits each year

Co-requisite(s): Band 09 or Music Concert Band 10 or Instrumental Music Concert Band 11/12; Audition

Drumline is required of percussionists who are enrolled in the MEI band program. This class gives percussionists an opportunity to enhance their drum rudiments skills and cadence playing.

NOTE: Drumline meets once a week outside of the timetable for 120 minutes. This is an extended day course.

Music 9 (Band) (MMU--09)

Prerequisite(s): Music-Band 8; Audition

This class is intended for high achieving students seeking a very fulfilling and creative experience through high-level performance and commitment and is critical in preparing students for Concert Band. Students are expected to show above average competency on their instruments, and be proficient in vocal singing, and physical movement. The class works together from a method book, studies theory, and cultivates listening habits to enrich appreciation. A major component of the MEI Band program is the marching band. Students enrolled in band also participate in the marching band as part of the regular scheduled Band 9 class. The marching band is in high demand for performances throughout the lower mainland particularly, for athletic events, parades, etc. Private lessons are strongly encouraged (Abbotsford Community Music School is just down the road). Percussionists who enroll in this class are required to also participate in the MEI Drumline. The Grade 9 Band can be expected to participate in numerous concerts and performances averaging between 25-30 per year. The Grade 9 band will also participate in a travel festival with associated costs (approx. \$500).

Attendance for rehearsals and performances is expected throughout the year. Festival trips are mandatory as each member is an integral member of the team and absences have a major impact overall. Absences are treated with significance and must be communicated to the director well in advance. Failure to do so can have significant impact on a student's grade and potential participation in the ensemble. Dates for trips and performance will be published well in advance so that students and parents can plan accordingly, making the necessary scheduling adjustments to accommodate these performances.

In all of this, students will be working to increase their ability to work as a team with a common goal. They will learn the fundamentals of communicating the language of music both verbally and on their instruments. They will begin to learn to identify personal strengths and weakness and how to overcome challenges and obstacles they encounter. Students will reflect on their performances and through self and peer evaluation be able to think critically to solve problems on multiple levels (musically, physically, socially, etc.).

NOTE: 180 minutes per week of practice is required to ensure progress and overall musical proficiency is maintained. A standard of performance is expected of all members and regular evaluation of student competency will be conducted. All students must have the standard* MEI performing arts uniform (see highlighted section above). A band folder will be provided for \$20.

Instrumental Music: Concert Band 10, 11, 12 (MMUCB-10, MIMCB-11, MIMCB-12)

4 credits each year 

Prerequisite(s): Audition

The Senior Concert Band is MEI's most demanding concert band ensemble and is intended for high achieving students seeking a very fulfilling and creative experience through high-level performance and commitment. Students are expected to show above average competency on their instruments, and be proficient in vocal singing, and physical movement. The Concert Band performs at various concerts and festivals throughout the year. Attendance at festivals has reasonable transportation and accommodation costs that students are expected to cover. Preparation for festivals often involves extra rehearsal time outside of the timetable that members are required to attend. A major component of the MEI Band program is the marching band. Students enrolled in band also participate in the marching band as part of the regular scheduled Concert Band class. The marching band is in high demand for performances throughout the Lower Mainland, particularly for athletic events, parades, etc. Concert Band can be expected to participate in numerous concerts and performances averaging between 25-30 per year. Private lessons are strongly encouraged. Percussionists who enroll in this group are required to also participate in the MEI Drumline. Every second year the Music Department does a major tour with the Concert Choir and Concert Band, (Razzberry Jam and Chamber Singers). The cost of this tour can range from **\$2000 - \$2500+** per student. Fundraising opportunities may be presented during the year to defray some of the costs. The tour happens in spring and lasts for approximately 7 days. It usually includes a major festival, school or community performances and

social events along the way. Students will be responsible for homework and assignments missed while away from school. Alternate year to the major tour could include a trip somewhere more locally (Western Canada/US), to one of a number of national festivals, and potentially other local festivals. Cost should be expected for these years as well for festival fees, transportation and accommodation, although not as high as our major tour expenses which happen every second year. Costs for alternate year tours will vary depending on whether we do shorter trips or one longer festival (approx. \$500).

ATTENDANCE: Attendance for rehearsals and performances is expected throughout the year. Festival trips are mandatory as each member is an integral member of the team and absences have a major impact overall. Absences are treated with significance and must be communicated to the director well in advance. Failure to do so can have significant impact on a student's grade and potential participation in the ensemble. Dates for trips and performance will be published well in advance so that students and parents can plan accordingly, making the necessary scheduling adjustments to accommodate these performances. In all of this, students will be working to increase their ability to work as a team with a common goal. They will learn to more adeptly communicate the language of music, both verbally and on their instruments. They will learn to identify personal strengths and weakness and how to overcome challenges and obstacles they encounter. Students will reflect on their performances and through self and peer evaluation be able to think critically to solve problems on multiple levels (musically, physically, socially, etc.). Leadership opportunities are available to exemplary students in the form of section leadership, which entails the implementation of the ensemble's vision, goals, and overall expectations.

NOTE: 180 minutes per week of practice is required to ensure that progress and overall musical proficiency is maintained. A standard of performance is expected of all members and regular evaluation of student competency will be conducted. All students must have the standard* MEI performing arts uniform (see highlighted section below). A band folder will be provided for \$20.

Instrumental Music: Jazz Band (Bluesberry Jam) 10 **(MMUJB-10)** 2 credits 🎸🎵

Prerequisite(s): Audition (September)

Co-requisite(s): Band 09, Music Concert Band 10 (Piano, Guitar, and Bass players needn't be enrolled in Band, but will need to be registered in an MEI performing arts class, e.g. Choir, Music Drama)

Bluesberry Jam is MEI's Junior Jazz Band. This course teaches the fundamentals of Jazz Band performance such as breath support, articulation, syncopation, jazz riffs and inflections, fingering dexterity and improvisation. "Blues" performs music in a variety of styles (swing, ballad, funk, and rock). The band participates at the Envision Jazz Festival in February, and performs in various concerts yearly. In this course, students will receive at least 50 hours of instruction each year.

NOTE: All students must have the standard* MEI performing arts uniform. Costs for festival fees, transportation and

accommodation should be anticipated. Students should be prepared to start a personal library of jazz recordings – 2 per year. Blues meets twice a week outside of the timetable (extended day course) for a total of 120 minutes.

Instrumental Music: Jazz Band (Razzberry Jam) 11, 12 **(MIMJB-11, MIMJB-12)** 2 credits 🎸🎵

Extended Day Course

Prerequisite(s): Audition (September)

Co-requisite(s): Band 09 or Music Concert Band 10 or Instrumental Music Concert Band 11/12 (Piano, Guitar, and Bass players needn't be enrolled in Band but will need to be registered in an MEI performing arts class, e.g. Choir, Music Drama)

Razzberry Jam is MEI's Senior Jazz Band as well as premier performing jazz ensemble. For this reason, a high level of performance and commitment is expected. "Razz" performs music in all the classic and contemporary jazz styles. This band participates in several festivals and performs at a variety of venues and concerts throughout the year. Preparation for festivals often involves extra rehearsal time which members are expected to attend. Students receive at least 50 hours of instruction each year.

NOTE: All students must have the standard* MEI performing arts uniform. Costs for festival fees, transportation and accommodation should be anticipated. Every second year (opposite year of the large Concert Choir/Concert Band tour) we attend the Lionel Hampton International Jazz Festival in Idaho, which generally costs around \$500-600. Students should be prepared to start a personal library of jazz recordings – 2 per year. Razz meets twice a week outside of the timetable for a total of 120 minutes.

Junior Worship Leadership 10, 11 0 credits 📖🎵

Prerequisite(s): Students must submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. An Audition will also be required.

This extended day course gives a coordinated introduction to the field of contemporary worship leading. Students will develop skills in worship leading through weekly rehearsals, informal discussions, and participation in public worship leading settings both in chapel and on deputation to local churches. Successful applicants will display sufficient ability either vocally or on their instrument to play skillfully before large congregations. Audio and Visual technicians are also encouraged to apply for this course. Students in this course do not need the MEI performing uniform.

NOTE: Limited enrollment. This course is offered only as an extended day course (i.e. discussions and rehearsals will take place outside of the timetable).

Senior Worship Leadership (Grade 11-12) 0 credits 📖🎵

Prerequisite: Students must submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. An Audition will also be required.

This extended day course builds onto the foundations set at the junior level, continuing with providing a coordinated introduction to the field of contemporary worship leading. Students will continue to develop their skills with the addition of bi-weekly classes where topics such as Worship Theology + Philosophy, Practical Music Theory, Songwriting, Sound Design, and many others will be discussed. Successful applicants will display sufficient ability either vocally or on their instrument to play skillfully before large congregations. Audio and Visual techs are also encouraged to apply for this course. Students in this course do not need the MEI performing uniform. Students in this course do not need the MEI performing uniform.

NOTE: Limited enrollment. This course is offered only as an extended day course (i.e. classes and rehearsals will take place outside of the timetable).

* The Standard MEI Performing Arts Uniforms:

All MEI performing arts groups have specific uniforms. Advanced groups may have additional uniform requirements (i.e., Marching Band and Chamber Singers – see below).

MEI Performing Arts Uniform (Band)

Shirts: MEI black dress shirt (specific women's or men's style) to be purchased from the MEI Music Department for \$40.

Pants: solid black dress pants (no denim)

Socks: solid black (no spots or stripes) (ladies: black socks, knee-highs or tights)

Shoes: solid black dress shoes not suede or canvas (but rather the kind one could polish)

Accessory: Men's vests and bow ties will be fitted and assigned from the MEI Music Department at the beginning of the year, for a rental fee of \$20 per year. Women's scarves to be purchased from the Music Department for \$15.

MEI Marching Band Uniform (Additional uniform - supplied by MEI Music Department)

Shirts: Students will be required to purchase a personalized shirt (supplied by MEI) that is to be worn for all formal and informal marching events. Cost - \$27.

Hat: Students will be required to purchase a black ball cap (supplied by MEI) that is to be worn for all informal marching events. Cost - \$20.

Shoes: Students will be required to purchase a pair of Adidas running shoes (supplied by MEI) that is to be worn for all formal and informal marching events. Cost - \$80.

Uniform: Students will be required to submit a cheque for uniform deposit for \$700, dated July 1st (year- end of current

school year), in the event that the formal marching uniform is lost or damaged.

MEI Concert Choir and Chamber Singers Uniform (supplied by MEI Music Department)

Uniforms are to be worn for all concerts unless other dress codes have been arranged. Men's shirts must be tucked in and buttoned at the neck – sleeves rolled down - and ties must be worn at all times in public at the concert venue.

Men's Shirts: Students will be required to purchase their own white dress shirt (collared – not button-down) with white buttons

Men's Pants: Students will be required to purchase their own black dress pants (solid, not denim)

Men's Shoes: Students will be required to purchase their own black dress shoes (not running shoes, suede or canvas)

Men's Vests/Bow ties: will be fitted and assigned from the MEI Music Department at the beginning of the year for a rental fee of \$20 per year.

Women's Dress: women's choir dresses will be fitted and assigned at the beginning of the year from the MEI Music Department for a rental fee of \$30 per year.

Women's Shoes: Students will be required to purchase their own silver dress shoes. (With lower heel – 1-2"). Details provided in class.

All Uniform rentals: Dresses or vests/ties must be returned in excellent condition at the end of the year (including the provided garment bags and hangers – each specifically numbered).

***There will be a charge for uniform pieces not returned.** Brooch replacement costs: \$20. Dress replacement: \$150. Bow tie replacement: \$10. Vest replacement: \$50. Garment bag/hanger replacement: \$5.

Additional Chamber Singers Uniforms: During the Christmas season Chamber Singers wear a "Christmas caroling" style uniform. Provided by the MEI Music Department. (Details in class)

Visual Arts

Arts Education – Visual Arts 9 (MAE--09) 2 Credits

Prerequisite(s): None.

This course offers an overview of visual arts as a foundation for further study. Visual Arts 9 encourages experimentation as well as introducing basic technical skills and the elements and principles of design. Students will be able to use the creative process to create and respond to the arts, through group work, individual studio work, and working with a variety of materials and processes.

The students will use the elements and principles of art while learning to take creative risks to express themselves through their art. The students will also learn to appreciate and critique their own art as well as others

Art Studio 10 (MVA10) 4 Credits

Prerequisite(s): Visual Arts 9.

Growth as an artist requires time, patience, and reflection. This course provides students the opportunity to create artwork while exploring identity and developing artistic competency in their skills, techniques, processes and strategies. Students will explore, create, reason, and reflect, while creating artistic works. Students will learn to communicate, document, connect and expand their ideas through their art making. This will be done using a variety of media: drawing, painting, collage, and print-making.

NOTE: Needed Materials: 4H, 2H, 2B, 4B, 6B Pencils, eraser, ruler, fine-liner, shading stick and Sketchbook.

School Sketchbooks: 10\$

School Supply Pack: (4H, 2H, 2B, 4B, 6B Pencils, sharpener, eraser, ruler, 2 fine-liners, shading stick): 10\$

Art Studio 11 (MVA11) 4 Credits

Prerequisite(s): Art Studio 10

This course is designed for students desiring more advanced forms of visual expression in drawing, painting, mixed-media, sculpture and printmaking. There will be an emphasis on building more advanced technical skills in a variety of media in order to create personal and thoughtful expressions. In addition, this course covers historical and contemporary progress in art as well as focusing on the development of critical thinking skills. Visual arts reflect the interconnectedness of the individual, community, history, and society, which will be expressed by developing unique aesthetic experiences.

NOTE: Needed Materials: 4H, 2H, 2B, 4B, 6B Pencils, eraser, ruler, fine-liner, shading stick and Sketchbook.

School Sketchbooks: 10\$

School Supply Pack: (4H, 2H, 2B, 4B, 6B Pencils, sharpener, eraser, ruler, 2 fine-liners, shading stick): 10\$

Art Studio 12 (MVA12) 4 Credits

Prerequisite(s): MVA11

Students who can only take one art class must take Art Studio 12. This course enables serious art students to work on their art portfolios and further refine their skills in various forms of visual expression. Students will be expected to do more complex pieces, as well as in-depth research, critiques, etc. This course gives art students the chance to explore new media and techniques as well as larger and more time-consuming works. Aesthetic experiences have the power to transform our perspective, and students will learn to do this through perseverance, resilience, and risk taking.

NOTE: Materials required will vary depending on student choices. Everyone must have a sketchbook and pencil.

School Sketchbooks: 10\$

Large Canvas (not mandatory): (24" x 18"; 30" x 18"; 48" x 30"); 10-20\$ each

Studio Arts 2D 12 (MVA12) 4 Credits

Prerequisite(s): Art Studio 12

This course is designed only for students wishing to take a second art class in grade 12. It is for the serious art student, capable of working independently, contemplating an art-related career or just having a keen interest in the visual arts. Students should be able to progress independently from initial concept, through research, production, evaluation and final display of their work. A primary focus of this course is the building of a strong personal portfolio. Visual arts are an essential element of culture and personal identity, and students will learn to make purposeful artistic choices that enhance depth and meaning in artistic works.

NOTE: Needed Materials: 4H, 2H, 2B, 4B, 6B Pencils, eraser, ruler, fine-liner, shading stick and Sketchbook.

School Sketchbooks: 10\$

School Supply Pack: (4H, 2H, 2B, 4B, 6B Pencils, sharpener, eraser, ruler, 2 fine-liners, shading stick): 10\$

Bible Education

Bible 9: Exploring the Biblical Story (XLCA09BIB)

The Big Ideas for Bible 9 are: Scripture is the central authority for all of matters of life and doctrine, the story of God is being played out in the context of the world, the kingdom of God is the story of the world: past, present, and future, and we love and glorify God with our head, heart, and hands. This course will encourage students to study and become familiar with the overarching themes and messages of the Bible, in particular the Old Testament. An emphasis will be placed on the Kingdom of God, Understanding the Bible, and the Historical Context of the Old Testament. Students will be evaluated based on the curricular competencies of recognizing, explaining, constructing, and demonstrating.

NOTE: An ESV study Bible is provided for the duration of the course. Students will be given an *Open My Eyes* workbook that they need to keep for their duration of MEI Bible. If they lose it, they will need to buy another one.

Bible 10: Exploring the New Testament (YPHR0A) 4 credits

Prerequisite(s): Currently enrolled in Grade 10

The Big Ideas for Bible 10 are: Scripture is the central authority for all of matters of life and doctrine, the story of God is being played out in the context of the world, Jesus is the central figure of God's story, and we love and glorify God with our head, heart, and hands. This course will encourage students to study and become familiar with the New Testament. This course will

encourage students to study and become familiar with the overarching themes and messages of the Bible, in particular the New Testament. An emphasis will be placed on Understanding the Bible, the Historical Context of the New Testament, and the Gospels. Students will be evaluated based on the curricular competencies of recognizing, explaining, constructing, and demonstrating.

NOTE: An ESV study Bible is provided for the duration of the course. Students will need to have the *Open My Eyes* workbook they got in Bible 9. If they are new to the school, they will be given one. If they lose it, they will need to buy another one.

Bible 11: Exploring Theology (YPHR-1A) 4 credits
Prerequisite(s): Currently enrolled in Grade 11

The Big Ideas for Bible 11 are: Scripture is the central authority for all of matters of life and doctrine, the story of God is being played out in the context of the world, theological study deepens one's relationship with Jesus, and we love and glorify God with our head, heart, and hands. This course will encourage students to study and become familiar with Anabaptist biblical theology and systematic theology in their historical context. Students will learn about and read from portions of the *Mennonite Brethren Confession of Faith* and from Wayne Grudem's *Christian Beliefs: Twenty Basics Every Christian Should Know* to gain an understanding of how Christian theology should affect Christian life and practice. An emphasis will be placed on Understanding the Bible and Theology. Students will be evaluated based on the curricular competencies of recognizing, explaining, constructing, and demonstrating.

Note: An ESV study Bible is provided for the duration of the course. Students will need to have the *Open My Eyes* workbook they got in Bible 10. If they are new to the school, they will be given one. If they lose it, they will need to buy another one.

Bible 12: Exploring The Christian Life (YPHR-2A) 4 credits
Prerequisite(s): Currently enrolled in Grade 12

The Big Ideas for Bible 12 are: Scripture is the central authority for all of matters of life and doctrine, the story of God is being played out in the context of the world, kingdom life involves personal devotion to Jesus that makes one think and live like him, and we love and glorify God with our head, heart, and hands. This course will encourage students to study and become familiar with how to live out the Christian life in their context in order to provide a firm biblical foundation for their post-secondary endeavors. Students will investigate varying worldviews and will be shown how Christianity makes sense of what is seen in the world. They will also be given the opportunity to participate in spiritual practices that will hopefully guide their love for Jesus for the rest of their lives. An emphasis will be placed on Understanding the Bible, Cultural Context and the Christian Life. Students will be evaluated based on the curricular competencies of recognizing, explaining, constructing, and demonstrating.

NOTE: A physical copy of the Bible is required.

Career Education

Core Christian beliefs laying the foundation for Career Education at MEI are that we are all made in the image of God and God has a will for each one of us, which includes using our gifts & strengths to love and serve Him, and others.

"And whatever you do or say, let it be as a representative of the Lord Jesus, all the while giving thanks through him to God the Father." Colossians 3:17

Career and Education 9 (MCE-09)
Prerequisite(s): None.

In Career Education 9, students will have the opportunity, as lifelong learners, to engage in the process of career-life planning through exploration, goal setting, self-assessment, reflection, personal support networks, workplace safety and practical application. Students will be encouraged to engage with others, to meaningfully contribute to their community and to further develop their knowledge, skills and competencies. Students will have the opportunity to work with myBlueprint – <http://myblueprint.ca>, an online career exploration resource and to, hopefully, participate in "Take Our Kids to Work Day".

Career-Life Education (MCLE-10) 4 credits
Prerequisite(s): Completion of grade 9

Career Life Education (CLE) is a BC Ministry of Education graduation required course. CLE involves learning and experiences related to topics such as self-assessment, careers and education, goal setting, financial planning, graduation requirements, post-secondary opportunities, cover letters, resumes and interviews, essential career and employability skills, mentorship, employment standards, workplace safety and volunteer/work related experiences. Students will also continue to use myBlueprint as a career exploration and portfolio resource ~ <http://myBlueprint.ca>. CLE students will have the opportunity to demonstrate and further develop their employability skills through completing 20 required hours of practical Career-Life Exploration, student-organized community work or volunteer experience outside of the classroom. The 20 hours of Career-Life Exploration will need to be completed between July 1st, after grade 9, and a week before the CLE course is finished. Safety is important. Students must be able to create a WorkSafeBC Clearance Letter, for the business/organization they are working/volunteering for, which says the company is "active and in good standing" - <https://www.worksafebc.com/en/insurance/why-clearance-letter/get-clearance-letter>.

NOTE: The Career-Life Exploration requirement must be completed in order to pass CLE. The 20 hours of Career-Life Exploration, used to meet the CLE requirement, may not be used to also meet part of the 30 required hours of Career-Life Exploration for Career Life Connections.

The 20 hours of Career-Life Exploration will need to be completed between July 1st, after grade 9, and a week before the CLE course is finished. Safety is important. Students must be able to create a WorkSafeBC Clearance Letter, for the business/organization they are working/volunteering for, which says the company is "active and in good standing" <https://www.worksafebc.com/en/insurance/why-clearance-letter/get-clearance-letter>.

Career Life Connections (MCLC-12) 4 credits

Prerequisite(s): Completion of Career Life Education 10 and grade 11.

Career Life Connections (CLC) is a BC Ministry of Education graduation required course. CLC will include classroom instruction, 30 hours of practical Career-Life Exploration (approved student organized community work or volunteer experience, fieldwork, entrepreneurship or special projects completed in Grade 11 and/or 12), a Capstone Project and mentorship appointments. CLC will look at topics, such as, personal assessment, post-graduation planning, career-life exploration, self-advocacy strategies, lifelong learning, active citizenship, employment marketing strategies, workplace safety, budget planning and a Capstone Project presentation. Students will also continue to use myBlueprint as a career exploration resource ~ <http://myBlueprint.ca>. Safety is important. Students completing 30 hours of community work or volunteer experience to meet the Career-Life Exploration requirement must be able to create a WorkSafeBC Clearance Letter, for the business/organization they are working/volunteering for, which says the company is "active and in good standing" <https://www.worksafebc.com/en/insurance/why-clearance-letter/get-clearance-letter>.

NOTE: Both the 30 hours of Career-Life Exploration, and Capstone must be completed in order to pass CLC. The 20 hours of Career-Life Exploration used in CLE may not be used as part of the 30 required hours of Career-Life Exploration in CLC.

Secondary Teacher Assistant 12 (YED 12A) 4 credits

Prerequisite(s): Successful completion of Grade 10. An initial "pre-screening" meeting with Career Programs staff and MEI sponsor teacher, followed by a student/parent meeting, will also be required. Applicants must also be available to attend some lunch and/or after school meetings throughout the semester.

Secondary Teacher Assistant 12 is a course for students who are interested in an education related career. Students will have the opportunity to be mentored by an MEI sponsor teacher, to work directly with the sponsor teacher in a "pre-practicum" context. Students will gain a greater understanding of working in the education field through working alongside the sponsor teacher, assisting them in working with individual and/or groups of students, and helping with the many things that a teacher does to create a positive learning and caring environment. Students will have the opportunity to demonstrate and further develop employability skills that they will be able to transfer to many areas of their life, including their future career.

Secondary Teacher Assistant 12 involves a minimum 90 hours of working as a teacher assistant and about 10 hours of additional course work, including some required lunch and/or after school meetings, journaling, self-assessment, leading small group and/or class activities/lessons, and a final project/presentation.

Work Experience 12A & 12B (MWEX-2A and MWEX-2B)

4 credits each 

Prerequisite(s): WEX 12A - Successful completion of Grade 10 & CLE or permission from Career Programs Coordinator; WEX 12B - Successful completion of WEX 12A. An initial "pre-screening" meeting with Career Programs staff, followed by a student/parent meeting, will also be required.

Through a shared partnership with the Key Learning Centre (KLC), an online school in BC, MEI is offering Work Experience (WEX) courses to qualified students. WEX courses are designed for students who wish to engage in career exploration and further develop their employability skills through practical, "hands-on" paid work or volunteer experience. *WEX courses also meet the Ministry of Education 4 credit Gr. 10, 11 or 12 Arts Education/Applied Design, Skills and Technologies graduation requirement.*

Each WEX course involves 90 hours of practical, "hands-on" work or volunteer experience and approximately 10-20 hours of online work, including a final project/presentation. Hours may be completed outside of school hours or, if it works within the schedule and the student is able to arrange transportation, during part of the school day.

Students are currently responsible to find their own work/volunteer placement(s). Safety is important. Students must be able to create a WorkSafeBC Clearance Letter, for the business/organization they want to work/volunteer for, which says the company is "active and in good standing" - <https://www.worksafebc.com/en/insurance/why-clearance-letter/get-clearance-letter>.

NOTES:

- WEX students will also earn an additional 2 credits by completing Connect Ed 11.
- MEI Secondary has established a partnership with our MEI Elementary and Middle schools, and so Grade 11 and 12 students, who are interested in pursuing a teaching career are invited to apply, through WEX, for the "MEI Elementary or Middle School Teacher Assistant Pre-Practicum Program".

Youth Work in Trades 11A, 11B, 12A and 12B (MWRK-1A, MWRK-1B, MWRK-2A and MWRK-2B) 4 credits each

Prerequisite(s): At least 14 years old. An initial "pre-screening" meeting with Career Programs staff, followed by a student/parent meeting, will also be required.

Through a shared partnership with the Key Learning Centre (KLC), an online school in BC, MEI is offering Youth Work in Trades (WRK)

courses to eligible students. Youth Work in Trades is a provincial program that gives eligible students the opportunity to already begin completing hours in an apprenticeship trade. The Industry Training Authority Website has information on over 100 Trades ~ <https://www.itabc.ca/>. WRK courses also meet the Ministry of Education 4 credit Gr. 10, 11 or 12 Arts Education/Applied Design, Skills and Technologies graduation requirement.

Each WRK course involves 120 hours of practical, “hands-on” trades related experience and approximately 5 hours of online work. Hours may be completed outside of school hours or for Grade 11 and 12 students, if it works within the schedule and the student is able to arrange transportation, during part of the school day. Students who complete 900 hours by December of the year they turn 19 may even be eligible for a \$1000 scholarship.

Students are currently responsible to find their own work/trade placement. Safety is important. Students must be able to create a WorkSafeBC Clearance Letter, for the company they want to work for, which says the company is “active and in good standing” - <https://www.worksafebc.com/en/insurance/why-clearance-letter/get-clearance-letter>.

NOTES: WRK students will also earn an additional 4 credits by completing Connect Ed 11 and Intro to Youth Work in Trades 12.

English Language Arts Education

English Language Arts courses at MEI all emphasize the development of the curricular competencies set out in the British Columbia curriculum: comprehension & connection (reading, listening, viewing), and creation & communication (writing, speaking, representing). In terms of content, MEI’s English courses employ a number of texts, both contemporary and traditional, to explore relationships between God and humanity, between people of various cultures, and between individuals and their societies. One of the goals of English Language Arts is also to recognize and appreciate the role of story, narrative, and oral tradition in expressing First Peoples’ perspectives, values, beliefs, and points of view. In all courses, students will be asked to communicate ideas in oral and written form, to think critically and creatively, and to develop personal connections to the texts studied in class.

English Language Arts 9 (MEN--09) 4 credits
Prerequisite(s): English Language Arts 8

English 9 leads students to deepen and broaden their competencies in reading comprehension and communication. It seeks to stimulate an appreciation for good literature and a sense of values as students interact, interpret, evaluate and respond to a variety of literary forms.

Literary Studies 10/Composition 10 (MLTST10 & MCMP10)
4 credits (2 cr. + 2 cr.)*
Prerequisite(s): MEN—09

This course deals with an in-depth study of the curricular competencies of language: comprehension & connection (reading, listening, viewing), and creation & communication (writing, speaking, representing). One of the goals of English 10 is also to recognize and appreciate the role of story, narrative, and oral tradition in expressing First Peoples’ perspectives, values, beliefs, and points of view. Literature also explores our relationships between God and humanity. In this course, students will be asked to communicate ideas in oral and written form, to think critically and creatively, and to develop personal connections to the texts studied in class.

NOTE: *This 4 credit course is the combination of two grade 10 Ministry Authorized English Language Arts 10 courses: **Literary Studies 10** (MLST10) 2 credits and **Composition 10** (MCMP10) 2 credits. Students will receive the same final mark for both course since they are integrated into one class.

Literary Studies 11 (MLTST11) 4 credits
Prerequisite(s): MLTST10 & MCMP10

This course enhances the competencies described in English 10 with a more advanced application of literature analysis, including understanding of short stories, novels, poetry, essays and drama. It also focuses on creative and informative writing of short stories, poetry and various types of essays including research writing. In addition, students will acquire knowledge of the conventions of language, such as vocabulary, grammar, punctuation and sentence structure.

English Studies 12 (MENST12) 4 credits
Prerequisite(s): MLTST11

This course helps students to deepen and broaden their reading, comprehension and communication competencies. It seeks to stimulate an appreciation for great literature of different genres and a sense of Christian values as students interact, interpret, evaluate and respond.

English Language Arts Honours Pathway

English Language Arts Honours courses 9 to 11 are designed to challenge students with an enriched curriculum that will prepare them for the Advance Placement (AP) English Literature and Composition 12 course and also to write the (AP) English Language exam in their senior year of high school. The course material in the English Language Arts Honours Program is enriched, the skills required are more advanced and the concepts are covered in more depth.

IMPORTANT: English Honours classes will be offered only if there are enough students (usually 15) who select it, meet the prerequisite and can fit this class on their timetable without conflict with other courses. To apply, submit an application form through MyEducation BC Student Course Selection, or MEI schools website.

English Language Art 9 Honours (MEN—09HON) 📖

Prerequisite(s): Successful completion of English Language Arts 8 and department head approval.

English Language Arts 10 Honours (MLTST10H & MCMP10H) 4 credits (2 cr.+2 cr.) 📖

Prerequisite(s): Successful completion of English Language Arts Honours with 80% or better and/or teacher's permission.

NOTE: This course will complete Literary Studies 10 (2 credits) and Composition 10 (2 credits) and prepare students for Literary Studies 11 Honours.

Literary Studies 11 Honours (MLTST11H) 4 credits 📖

Prerequisite(s): Successful completion of English Language Arts 10 Honours with 80% or better and/or teacher's permission.

NOTE: This course will complete the requirement for MELST11.

Advanced Placement (AP) English Literature and Composition 12 (MLTST12H) 4 credits 📖

Prerequisite(s): Successful completion of MELST11H with 80% or better and/or teacher's permission.

AP is a widely recognized program that most Canadian universities recognize as the equivalent of first-year coursework. For example, a student who scores a 4/5 or 5/5 on the AP English exam will be granted first year credit at most PSI.

NOTE: This course meets the requirement for the completion of MENST12 (4 credits). Students will receive a total of 8 credits for taking this course.

Language Development & Culture (Available for International Students Only)

Language and Culture 10 (YESFL0B) 2 credits

Board/Authority Authorized (BAA) Course

Prerequisite(s): International students only. Permission from instructor required.

The course focuses on the English language skills students require to be effective communicators in the classroom, to build upon their knowledge of life with a homestay, and to continue to acclimatize them to Canadian life. The course is based on the principle that in order to be successful in the Canadian classroom and society, students must acquire foundational skills in communication, Canadian culture and history. It focuses on developing student's skills and increasing their knowledge in ways that will allow them to be more effective in English in the regular academic stream. The goal of this course is for students to develop skills and increase knowledge through classroom lessons, activities and exercises. Students will practice and improve skills that will enhance their academic performance and enrich their experience in Canadian society. The course also places an emphasis on the acquisition of knowledge of the Indigenous perspective through Indigenous literature and other media.

Teaching and Leadership Education

Leadership Courses

APEX: Student Leadership 9, (XLDC 09) 📖 2 credits.

Prerequisite(s): Students must submit a completed [application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

This course (Wednesday mornings 7:00 - 8:00 a.m.) is designed to introduce students to leadership qualities and encourage students to be positive leaders in the school and community. Students will examine and discuss leadership qualities such as personality, behaviour, influence, and service. They will plan and participate in activities that will promote a positive atmosphere in our school and community. They will complete approximately 4 hours of school/community service each term.

NOTE: Cost \$15-\$100 for workshops / retreats / seminars (most are optional).

APEX: Leadership 10, 11, 12 (YIPS-0A) (YIPS-1A) (YIPS-2A)

2 credits each year 📖

Prerequisite(s): completion of APEX: Leadership 9 is recommended. Limited enrollment. Students must submit a completed [application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

This course (Wednesday mornings 7:00 - 8:00 a.m.) is an extension of the Introductory Leadership courses. It is designed to build on students' knowledge and experience in leadership. Students will be increasingly involved in school and community events. They will play significant role in the planning and execution of the annual Christmas Banquet and several other large-scale events. They will study current leadership theory and learn more about what it means to be an effective and positive leader. They will complete approximately 5 hours of school and community service per term.

NOTE: Cost \$15-\$100 for optional workshops / retreats / seminars.

Teaching Courses

Peer Tutoring 11 (YIPS-1B) 📖 4 credits

Prerequisite(s): A good command of basic academic skills is needed. (C+ minimum is required in EN 11 and MA 11). A good attendance record is required. Approval from the instructor and a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

Peer Tutoring 11 is designed to develop responsibility, communication and organization skills through practical experience in helping individual students or small groups in a

classroom setting. Following the initial in-school training at the start of the course, students will work with an individual student in the Learning Support block. The acquired skills will be valuable in the future in working-with-people vocations, such as teaching.

Peer Tutoring 12 (YIPS-2B) 4 credits

Pre-requisite(s): Successful completion of Peer Tutoring, approval from the instructor and a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. Limited enrollment.

Peer Tutoring 12 carries on from Peer Tutoring 11 by continuing to improve skills through practical experience in helping individual students or small groups in a classroom setting. Students will continue working with an individual student in the Learning Support block. The acquired skills will be valuable in the future in working-with-people vocations, such as teaching. Instead of completing an additional training course, students will be required to conduct a research project.

Math Education

Mathematics Pathways

The Common Curriculum Framework for Grades 9–12 Mathematics includes three pathways: Workplace Mathematics, Foundations of Mathematics, and Pre-calculus. See the *Mathematics Pathways Diagram* attached indicating the MEI Minimum Pre-requisites and Sample Post-Secondary Options. Each pathway is designed to provide students with the mathematical understandings, rigour and critical-thinking skills that have been identified for specific post-secondary programs of study and for direct entry into the work force. Problem solving is also an important component and appears throughout each course at various times.

Workplace Mathematics Pathway

This pathway is designed to provide students with the mathematical understandings and critical-thinking skills into the work force. Topics include Algebra, Geometry, Measurement, Numbers, Statistics and Probability.

Foundations of Mathematics Pathway

This pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in programs that do not require the study of theoretical calculus.

Topics include Financial Mathematics, Geometry, Measurement, Numbers, Logical Reasoning, Relations and Functions, Statistics and Probability.

Pre-Calculus Pathway

This pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for entry into post-secondary programs that require the study of theoretical calculus. Topics include: Algebra, Numbers,

Measurement, Relations and Functions, Trigonometry, and Permutations, Combinations and Binomial Theorem.

Prerequisite(s) General: Students are expected to meet all course prerequisites and will be placed into appropriate courses, unless they receive written permission from Mr. Balzer, Math Department Head. Therefore, students should choose the appropriate Math course based on their current math average this year. In June, the Math Department will place students who, according to their final mark do not meet prerequisites, in the appropriate Math courses.

Questions & Answers

Which Math course is best suited to my student?

While there is no “rule” about which Math course is right for each student, the decision can be made easier by thinking about your student’s ability and interest in Math, and future education and career plans. The new courses have been designed to facilitate student success after high school. For example:

- If your student has struggled in Mathematics 8 or Mathematics 9, enjoys working on projects or hands-on activities, or intends to pursue a trade or technical job after high school, then the Workplace Mathematics pathway is the best choice.
- If your student enjoys working on projects or hands-on activities, or is planning further studying in the Social Sciences like Economics or Arts or Humanities at post-secondary, then the Foundations pathway will be the best choice.
- If your student has been very successful in Math 9, enjoys the challenges of Math, and is thinking about future education or a career that involves Sciences or Engineering at a university, then starting the Pre-Calculus pathway will be the best choice.

Your student’s educational choices after high school depend, in part, on the courses they take in high school. To make an informed decision about which course is best suited for your student, you need to find out as much as you can about each pathway. Parents and students need to remember that grade 10 has ONLY two math courses available but there are three pathways in grade 11 to 12.

What happens if we change our mind about the course decision that we have made?

Because the three pathways were designed to give students different skills, attitudes and knowledge for different career and post-secondary paths, they were not designed specifically to allow for lateral movement between pathways. As a result, MEI will not be suggesting students move from one pathway to another, once a choice has been made and a student is working in one pathway’s courses. Students who choose grade 10 Workplace Mathematics CANNOT move to the Foundations stream or Pre-Calculus stream. However, students who have successfully completed the common Foundations of Math and Pre-Calculus 10 can transfer to Apprenticeship and Workplace Mathematics 11.

Mathematics Courses

Workplace Mathematics 9 (MMA-09)

Prerequisite(s): This course is for students who need more review and practice in order to be sufficiently prepared for Math 9 or who have chosen the Workplace pathway. Grade 9 students will be placed in Workplace Math 9 by the Secondary School Administration based on their performance in Math 8.

This will prepare students for Workplace Mathematics 10 and 11 pathway. Students who do not successfully complete this course must repeat it before moving on to Workplace Mathematic 10. This course includes the following components: Number, Number Operations, Data Analysis, Integers, Fractions, Geometry and Measurement.

NOTE: A notebook, scientific calculator, pencil, eraser, ruler and geometry set are required.

Mathematics 9 (MMA--09)

Prerequisite(s): Successful completion of regular Mathematics 8 program, with teacher recommendation.

Welcome to Math 9! This course is designed to develop students' curricular competency in the following areas: reasoning and modeling, understanding and solving, communicating and representing, connecting and reflecting. Topics include: operations with rational numbers, exponents and exponent laws, operations with polynomials, linear relations, graphing, multi-step linear equations, spatial proportional reasoning, statistics and financial literacy. The focus of this course is on problem solving, and Indigenous perspectives are reflected within the learning standards. During this course, students will be self-evaluating their own learning as a method of formative assessment, and they will also be assessed with various activities, projects, quizzes and chapter tests. Core competencies such as communication skills, thinking skills and personal and social responsibilities will also be embedded and developed throughout the course to engage students in life-long learning.

Workplace Mathematics 10 (MWPM-10) 4 credits

Prerequisite(s): 50% or better in MWPM-9 or 50% in MMA-9

This course is designed to develop students' curricular competency in the following areas: reasoning and modeling, understanding and solving, communicating and representing, connecting and reflecting. Topics include unit conversion, measurement (area & volume), graphing, income, basic trigonometric ratios and statistics. The focus of this course is on problem solving, and Indigenous perspectives are reflected within the learning standards. During this course, students will be self-evaluating their own learning as a method of formative assessment, and they will also be assessed with various activities, projects, quizzes and chapter tests. Core competencies such as communication skills, thinking skills and personal and social responsibilities will also be embedded and

developed throughout the course to engage students in life-long learning.

NOTE: a student workbook is provided. A scientific calculator is required.

Workplace Mathematics 11 (MWPM-11) 4 credits

Prerequisite(s): 50% or better in MWPM-10 or 50% in MFMP-10

This course is designed to develop students' curricular competency in the following areas: reasoning and modeling, understanding and solving, communicating and representing, connecting and reflecting. Topics include financial literacy (personal investments, loans, and budgeting), rate of change, how probability and statistics are used in different contexts, interpreting graphs in society, 3D objects: angles, views, and scale diagrams. The focus of this course is on problem solving, and Indigenous perspectives are reflected within the learning standards. During this course, students will be self-evaluating their own learning as a method of formative assessment, and they will also be assessed with various activities, projects, quizzes and chapter tests. Core competencies such as communication skills, thinking skills and personal and social responsibilities will also be embedded and developed throughout the course to engage students in life-long learning.

NOTE: a student workbook is provided. A scientific calculator is required.

Foundations of Mathematics and Pre-Calculus 10 (MFMP-10) 4 credits

Prerequisite(s): 60% or better in MMA-9 (Math 9 Workplace does not qualify)

This course is a **common program** for students desiring to carry on in either the **Foundations of Mathematics 11 and 12** pathway or the **Pre-Calculus 11 and 12** pathway.

This course is designed to develop students' curricular competency in the following areas: reasoning and modeling, understanding and solving, communicating and representing, connecting and reflecting. Topics include operations with exponents, prime factorization, functions and relations, linear functions, arithmetic sequences, systems of linear equations, polynomials, primary trigonometric ratios, and financial literacy. The focus of this course is on problem solving, and Indigenous perspectives are reflected within the learning standards. During this course, students will be self-evaluating their own learning as a method of formative assessment, and they will also be assessed with various activities, projects, quizzes and chapter tests. Core competencies such as communication skills, thinking skills and personal and social responsibilities will also be embedded and developed throughout the course to engage students in life-long learning.

NOTE: a student workbook is provided. A scientific calculator is required. This course has a final exam worth 20% of the final grade.

Foundations of Mathematics 11 (MFOM-11) 4 credits

Prerequisite(s): 60% or better in MFMP-10

This course is for students desiring to carry on, if needed, in the Foundations of Mathematics 12 pathway. This course is designed to develop students' curricular competency in the following four areas: reasoning and modelling, understanding and solving, communicating and representing, connecting and reflecting. Topics include numbers, computational fluency, patterning, geometry, data and probability, as well as financial literacy. The focus of this course is on problem solving, and Indigenous perspectives are reflected within the learning standards. During this course, students will be self-evaluating their own learning as a method of formative assessment, and they will also be assessed with various activities, projects, quizzes, as well as chapter tests. Core competencies such as communication skills, thinking skills and personal and social responsibilities will also be embedded and developed throughout the course to engage students in deep learning and life-long learning.

NOTE: student workbook is provided. Graphing calculator is required. This course has a final exam worth 20% of the final grade.

Foundations of Mathematics 12 (MFOM-12) 4 credits

Prerequisite(s): 60% in MFOM-11 or 50% in MPREC-11

This course is designed to develop students' curricular competencies in the following four areas: reasoning and modelling, understanding and solving, communicating and representing, connecting and reflecting. Topics include financial planning, combinatorics, probability, regression analysis, exponential and logarithmic functions and equations, as well as trigonometric functions and applications. The focus of the course is on problem solving, with Indigenous perspectives reflected within the learning standards. Students will be assessed through various activities, quizzes and unit tests. During the course, students will also be self-evaluating their own learning as a method of formative assessment. Core competencies such as communication and thinking skills, personal and social responsibilities will be encouraged throughout the course in order to engage students in life-long learning.

NOTE: A student workbook is provided. A graphing calculator is required. This course has a final exam worth 25% of the final grade.

Pre-Calculus 11 (MPREC-11) 4 credits

Prerequisite(s): 73% or better in MFPM-10 (Math 10 Workplace does not qualify). This course is for students desiring to carry on, if needed, in the Pre-Calculus 12 pathway.

This course is designed to develop students' curricular competency in the following areas: reasoning and modeling, understanding and solving, communicating and representing, connecting and reflecting. Topics include operations with radicals, graphing and solving quadratic equations and systems of quadratic equations and inequations, rational expressions, primary trigonometric ratios, and financial literacy. The focus of this course is on problem solving, and Indigenous perspectives

are reflected within the learning standards. During this course, students will be self-evaluating their own learning as a method of formative assessment, and they will also be assessed with various activities, projects, quizzes and chapter tests. Core competencies such as communication skills, thinking skills and personal and social responsibilities will also be embedded and developed throughout the course to engage students in life-long learning.

NOTE: A student workbook is provided. Graphing calculator is required. This course has a final exam worth 20% of the final grade.

Pre-Calculus 12 (MPREC-12) 4 credits

Prerequisite: 67% or better in MPREC-11

This course is designed to develop students' curricular competencies in the following four areas: reasoning and modelling, understanding and solving, communicating and representing, connecting and reflecting. Topics include transformations, exponential functions and equations, geometric sequences and series, logarithmic functions and applications, trigonometric functions and identities, as well as conics. The focus of this course is on problem solving, with Indigenous perspectives reflected within the learning standards. Students will be assessed through various activities, quizzes and unit tests. They will also be given the opportunity to self-evaluate their own learning through formative assessment. Core competencies – thinking and communication skills, personal and social responsibilities – will be developed throughout the course to encourage students towards life-long learning.

NOTE: A student workbook is provided. A graphing calculator is required. This course has a final exam worth 25% of the final grade.

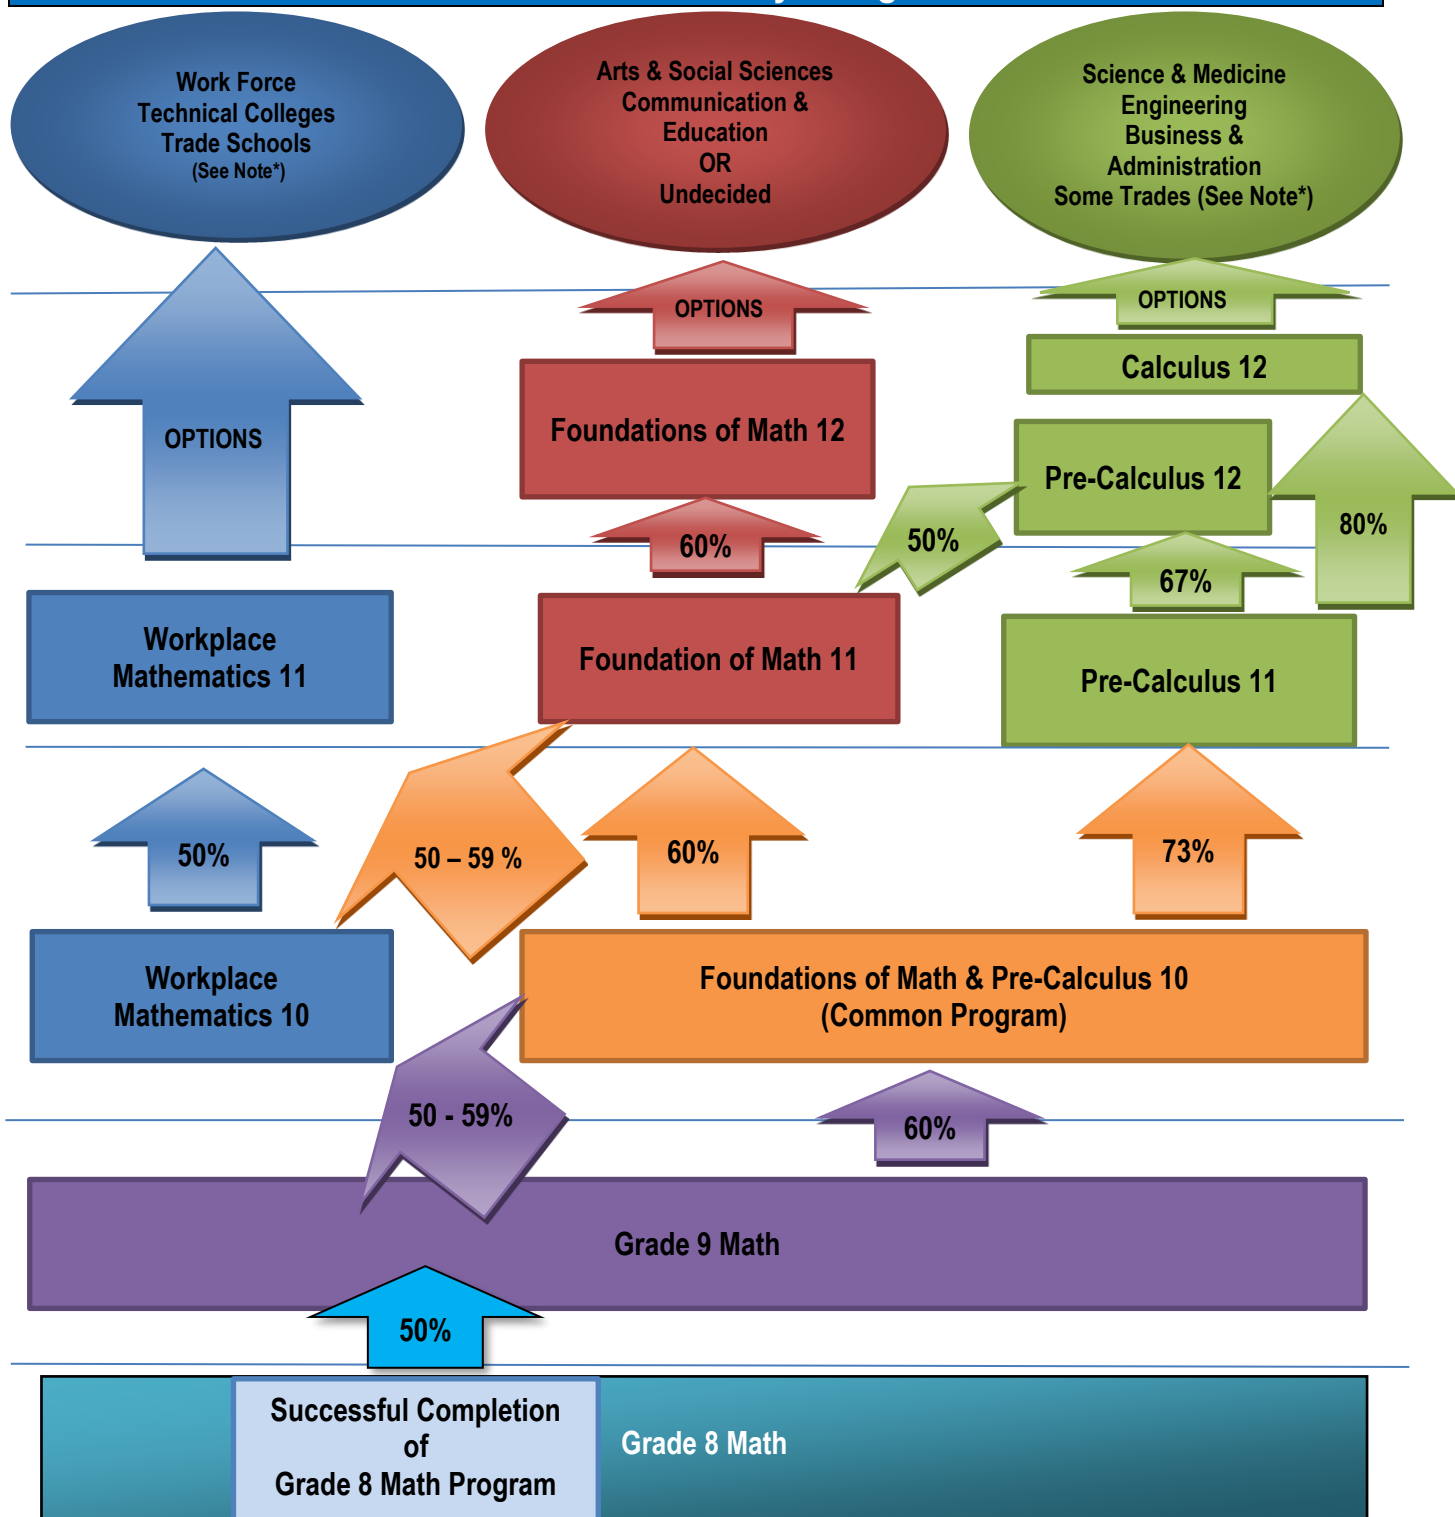

Calculus 12 (MCALC 12) 4 credits

Prerequisite(s): 80% or better in MPREC-11 and 80% or better in MPREC-12, completed at MEI.

This course is a pre-cursor for any student wishing to take post-secondary calculus. This course is designed to develop students' curricular competency in the following areas: reasoning and modeling, understanding and solving, communicating and representing, connecting and reflecting. Topics include derivatives, differentiation rules and applications, integrals and applications of integration. The focus of this course is on problem solving. During this course, students will be self-evaluating their own learning as a method of formative assessment, and they will also be assessed with various activities, projects, quizzes and chapter tests. Core competencies such as communication skills, thinking skills and personal and social responsibilities will also be embedded and developed throughout the course to engage students in life-long learning.

See *Mathematics Pathways Diagram* on the following page

Mathematics Pathways Diagram

NOTE*: Some trades schools (e.g. Electrical at BCIT) require Pre-Calculus 11 or 12. Some post-secondary institutions (e.g. UBC Okanagan or UFV) do not have a mathematics pre-requisite preference as part of their admission. Please consult the general or program specific admission requirements of any PSI of your choice to know in advance what mathematics pre-requisite they are asking for.

Physical and Health Education

Physical and Health Education 9 (MPHE-09---Boys, MPHE-09---Girls)

Prerequisite(s): MPHE-08

This course will integrate the MEI faith-based values with the BC Government Curricular ideas. The overarching principles are:

1. Daily participation in different types of physical activity influences our physical literacy and personal health and fitness goals.
2. Lifelong participation in physical activity has many benefits and is an essential part of a healthy lifestyle.
3. Healthy choices influence our physical, emotional, and mental well-being.
4. Healthy relationships can help us lead rewarding and fulfilling lives.
5. Advocating for the health and well-being of others connects us to our community.

The physical education component of this course provides students with the knowledge, understanding, attitudes, abilities and fundamental skills required to maintain active physical health both now and in the future. Students will also participate in various individual/dual and fitness activities as well as in various team games. The health education component of this course provides students the ability to identify factors that influence health messages from a variety of sources, and analyze their influence on behaviour. It also provides students strategies for avoiding and/or responding to potentially unsafe, abusive, or exploitive situations. It proposes approaches for developing and maintaining healthy relationships and create plans for promoting the health and well-being of the school and community. There will be opportunity within this course to examine strategies for promoting mental well-being for self and others, to assess and evaluate strategies for managing problems related to mental well-being and substance use. Students will also create and evaluate strategies for managing physical, emotional, and social changes during puberty and adolescence and explore and describe factors that shape personal identities, including social and cultural factors.

NOTE: PE Gym strip is available from PE teacher on first day of class. (\$20 shorts, \$20 t-shirt payable through Cash Online)

Physical and Health Education 10 (MPHED---Boys, MPHED---Girls) 4 credits

Prerequisite(s): MPHE-09

This course involves similar activities as PE 9; however, students will be expected to demonstrate a higher degree of skill in the competencies.

This course will integrate the MEI faith-based values with the BC Government Curricular ideas. The core competencies are:

1. Mental Well Being - Students will analyze strategies for promoting mental well-being for self and others as well as managing physical, emotional and social changes during puberty.
2. Physical Literacy - students develop, refine, and apply fundamental movement skills in a variety of physical activities and environments.
3. Healthy and Active Living - provides opportunities for students to participate daily in physical activity designed to enhance and maintain health components of fitness.
4. Social and Community Health - students develop positive interpersonal behaviors, healthy relationships, and creating strategies for promoting health and well-being of self, school, community and others.

The physical education component of this course provides students with the knowledge, understanding, attitudes, abilities and fundamental skills required to maintain active physical health both now and in the future. Students will need to show competence in a variety of physical situations and tasks.

The health education component of this course continues to build on MPHE-9 provides students the opportunity to demonstrate skill in the social, community and mental health competencies.

NOTE: PE Gym strip is available from PE teacher on first day of class. (\$20 shorts, \$20 t-shirt payable through Cash Online)

Active Living 11, 12 (MACLV11/12) 4 credits each year

Prerequisite(s): MACLV11: Grade 10 completion; MACLV12: Grade 11 completion and Permission of the Instructor.

This course will integrate the MEI faith-based values with the BC Government Curricular ideas. Physical Education 11 and 12 are elective programs at MEI with a broader scope of activities than MPHE-09 or grade 10 MPHED---Boys, MPHED---Girls.

The overarching principles are:

1. Physical Literacy: Physical activity is an important part of overall health and well-being.
2. Health and Active Living: Finding enjoyable recreational activities can motivate people to participate more regularly in physical activity.
3. Personal and Community Health: Safety and injury prevention practices allow lifelong participation in physical activities. Reasonable choices affect physical and mental health.

These two courses will give students an opportunity to develop their physical fitness through performance, and leisure activities that all foster a balanced, healthy lifestyle. Students will be required to investigate, analyze and discuss healthy choices, healthy relationships, positive mental health and fostering community. Students will be required to display competence in leadership/serving the community via Service Hours for the school and Athletics Department. Students will be required to complete a minimum of 15-20 hours of service per year beyond regular class time to pass the class. Students are expected to have a positive attitude towards all activities and serving the school via the Physical Education Department.

NOTE: Activity fees of \$90-100 for MACLV11 boys and MACLV11 girls; and \$100-120 for MACLV12 boys and MACLV12 girls. (Payable through Cash Online)

Advanced Performance Physical Education 11, 12 (YHRA-0A, YHRA-1A, YHRA-2A) 4 credits

Prerequisite(s): Students must submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. An instructor interview is also required. Limited enrollment.

This is a course designed for high performance level athletes who are interested in augmenting their training regime through a sport-specific training program. The course will involve the students demonstrating competence in the following training programs: plyometrics, sport-specific weight training, jump program, agility and core training, aerobic and anaerobic training, skill development, self-reflection and analysis. Students will demonstrate a variety of competencies in the areas of sports psychology, nutrition, and mental toughness. Students considering this course must be highly self-motivated, interested in training and prepared to work to their maximum potential in each class.

There are limited spots available in this course. Preference will be given to those who participate on school teams.

NOTE: Gym strip is available from PE teacher on first day of class. (\$20 shorts, \$20 t-shirt payable through Cash Online)

Outdoor Education 11, 12 (MODED 11, 12) 4 credits

Prerequisite(s): Students must submit a completed [Application](#) through Microsoft Forms; link also available on MEI Schools website. An instructor interview is also required. Recommended: C or better in MPHE-09, PHED 10 or MACLV11. Limited enrollment (16 seats). **Priority given to senior students.**

This extended day course is designed to allow students with an interest in outdoor pursuits an opportunity to explore many different outdoor activities. These include hiking, backpacking, mountain biking, kayaking, rock climbing (indoor and outdoor), snowshoeing, alpine touring (skiing/snowboarding), backcountry winter camping, orienteering, and caving. Through these activities, students will develop technical skills, environmental awareness, sense of community, sense of self and personal health and fitness. They will also learn skills in leadership, trip planning and preparation, first aid, route finding and risk management. There will be several mandatory multi-day trips requiring students to miss school days; therefore, students must be able to maintain their grades in other courses. Students will be evaluated using a variety of approaches, including personal journals, skill presentations, reports, class projects and practical camp situations. This is a linear extended day course, meaning we will meet once or twice a week immediately after school throughout the year (3:00 to 4:30 pm - days to be determined). The course fee is \$900, which will cover mandatory activities. It is necessary for students to obtain suitable layered clothing including a waterproof-breathable jacket, as well as a sleeping bag, a sleeping pad and good hiking boots. The school will

provide students with backpacks, tents, tarps, water purification systems, stoves, pots, fuel, and over bags.

NOTE: This course is extremely dependent on environmental conditions and consequently the outline of activities listed above is subject to change. Outdoor activities will depend on the weather, time and the ability of the class. Field trips will be dependent on the above conditions as well as scheduling. If the instructor is not entirely qualified to teach segments of the course, experts in the field will be hired to ensure complete safety from foreseeable hazards.

Psychology Education

Introduction to Psychology 12 (YPSYC2A) 4 credits

Prerequisite(s): Completion of grade 11 or permission from the teacher

In this introductory course, students will survey from a Christian worldview eight selected units from the first post-secondary year program in the field of psychology. Those units include: (1) The Science of Behavior, (2) Studying Behaviour Scientifically, (3) Biological Foundations of Behaviour, (4) Sensation and Perception, (5) States of Consciousness, (6) Stress, Coping, and Health, (7) Psychological Disorders, and (8) Treatment of Psychological Disorders. This course will be taught from the perspective that the search for truth is the primary goal of Christian education, and scientific discovery that integrates with scriptural principles can illuminate our understanding of each other and ourselves as God's creation. However, this course will also reflect on Indigenous perspectives for each of the units covered. This course has an academic rigor to it. Students are expected to read a vast section of the textbook, remember and understand a large amount of content and use critical thinking skills to reflect on the key concepts of this course.

NOTE: This course does not qualify as an academic course for university admission.

NOTE: Textbook provided: Passer, M. W., Smith, R. E., L. A. M., B. M. J., & W., M. D. (2011). *Psychology Frontiers and Applications Fourth Canadian Edition*. McGraw-Hill Ryerson.

Science Education

The core competencies for all our science courses are to develop students' abilities to question and predict, plan and conduct, process and analyze data and information, evaluate, apply and innovate, and to communicate. Each course has its curricular competencies that center on 3-4 "Big Ideas".

Science 9 (MSC--09)

Prerequisite(s): MSC--08

In this course, students will continue to develop the science curricular competencies while exploring four big ideas: 1. Cells

are derived from cells. 2. The electron arrangement of atoms impacts their chemical nature. 3. Electric current is the flow of electric charge. 4. The biosphere, geosphere, hydrosphere, and atmosphere are inter-connected, as matter cycles and energy flows through them. The course completion is a prerequisite for Science 10.

Science 10 (MSC--10) 4 credits

Prerequisite(s): MSC-09

In this course, students will continue to develop the science curricular competencies while exploring four Big Ideas:

1. DNA is the basis for the diversity of living things.
2. Energy change is required as atoms rearrange in chemical processes.
3. Energy is conserved, and its transformation can affect living things and the environment.
4. Explore to what extent the formation of the universe can be explained by the big bang theory.

The course completion is a prerequisite for all senior science courses.

Junior Science Honours Program

The Junior Science Honours Program is designed to challenge students with an enriched science curriculum that develops a depth of understanding. The courses highlight critical thinking, leadership, character, teamwork, collaboration, advanced lab skills and competitions. The Junior Science Honours courses prepare students for Senior Sciences. Students graduating from this program will be prepared for a high level of success in post-secondary science and have insights into careers in Science. They will also be prepared to complete the Advanced Placement (AP) Science exams in their senior year.

IMPORTANT: A particular science honours course will be offered only if there are enough students to form a class. Please apply for an honours class by submitting an application form, available on MyEducation BC student course selection portal, or the MEI schools website.

Science 9 Honours (MSC--9) 📖

You can sign up for this course but it is the Grade 8 Science Teachers who determine whether you are accepted or not. They will base their decisions on your demonstrated passion for Science learning, strong problem solving abilities, creative and critical thinking skills, ability to collaborate, high level of success in Math 8 and your enjoyment of working hard at understanding. This course covers the same topics as MSC-09 but extends them to deeper levels of understanding and places greater emphasis on making interconnections. Assessments of all types are generally more challenging and more fun. Grades are curved to reward the student for the extra challenges and deeper learning.

Science 10 Honours (MSC--10) 4 credits 📖

Prerequisite(s): MSC-09 honours or recommendation of your MSC-09 Teacher

This course covers the same topics as MSC-10 but extends them to deeper levels of understanding and places greater emphasis on making interconnections. Curriculum concepts are expanded to the Biology 11, Chemistry 11 and Physics 11 levels. Emphasis is placed on critical and creative thinking, collaboration, good science and scientific communication. Assessments of all types are generally more challenging and more fun. Grades are curved to reward the student for the extra challenges and deeper learning.

Anatomy and Physiology 12 (MATPH12) 4 Credits

Prerequisite(s): 67% or higher in MBI--11 or MLFSC11 or with instructors permission. MCH--11 is not required but is strongly recommended.

In this course, students will continue to develop the science curricular competencies while exploring three big ideas: 1. Homeostasis is maintained through physiological processes. 2. Gene expression, through protein synthesis, is an interaction between genes and the environment. 3. Organ systems have complex interrelationships to maintain homeostasis. The course is designed to foster an appreciation design of the human body and prepare students for further studies of anatomy and physiology.

Chemistry 11 (MCH--11) 4 credits

Prerequisite(s): 67% or better in MSC--10 and MFMP-10

Co-requisite(s): Enrolled in MFOM--11 or MPREC--11 (preferred)

This course is a study of matter, its composition, structure and properties. In this course, students will work with the smallest particles that exhibit the particular properties of substances. Through studying chemistry, students will attain a solid understanding of how things work at the atomic, ionic and molecular level. The Big Ideas are:

1. Atoms and Molecules are building blocks of matter.
2. Applications of Organic Chemistry are significant to health, society and environment.
3. Atoms and Molecules are quantified by moles.
4. Chemical Reactions conserve matter and energy.
5. Solubility is determined by the nature of the solute and the solvent.

This understanding is central to acquiring a well-rounded education in Science. Students will also spend a substantial amount of time learning technical lab skills and solving problems. This includes working with a wide variety of equipment, gathering data, making qualitative and quantitative observations, calculations, drawing conclusions and communicating with good science. This course uses the Workbook BC Science Chemistry 11 by Edvantage Interactive and comes with full access to a website that completely supports the course with the latest technology including video lessons, solutions, and practice quizzes. The workbook can also be downloaded onto your personal device where you can do everything digitally.

NOTE: This course has a school based lab exam and final exam collectively worth 20% of the course. Chemistry 11 is a strongly recommended prerequisite for Biology 12.

Chemistry 11 Honours (MCH--11) 4 credits 📄 (Application Form required)

Prerequisite(s): successful completion of Science 10 Honours and Pre-Calc 10 and enrolled in Pre-Calc 11 or permission of the Instructor

This course covers all the topics that MCH-11 does plus some additional topics. Students will cover ideas faster in order to get the additional topics covered but greater emphasis is placed on gaining a deeper understanding. This Course uses the Workbook Edvantage Interactive AP Chemistry 1. If you are planning to write the AP (Advanced Placement) Chem Exam this course is vital in preparing for that. Chemistry 11 Honours students may also write the University of Waterloo Avogadro Exam as a fun Canada-wide contest test.

Chemistry 12 (MCH--12) 4 credits

Prerequisite(s): 67% or better in MCH--11 and MFOM-11 or MPREC11(preferred).

Co-requisite(s): Enrolled in MPREC--12 (preferred) or MFOM--12

Chemistry 12 is a course intended to give those students majoring in sciences or technical related fields, a comprehensive background in a few key areas in Chemistry. The five Big Ideas include:

1. Reaction Kinetics-reactants must collide to react
2. Dynamic Equilibrium-can be shift by changes in conditions
3. Saturated Solutions are systems in equilibrium
4. Acids and Base strength depends on % dissociation
5. Oxidation and Reduction complement each other with the loss and gain of electrons

The skills and processes students use and develop are the same as those used by scientists at work. The development of these skills will allow students to solve problems, think critically, make decisions, find answers and satisfy their curiosity. This course uses the Workbook BC Science Chemistry 12 by Edvantage Interactive and comes with full access to a website that completely supports the course with the latest technology including video lessons, solutions, and practice quizzes. The workbook can also be downloaded onto your personal device where you can do everything digitally.

NOTE: This course has a school based lab exam and final exam collectively worth 25% of the final grade.

Chemistry 12 Honours (MCH--12) 4 credits with the possibility of 4 University credits 📄 (Application Form required)

This course covers all the topics that MCH-12 does plus some additional topics. Students will cover ideas faster in order to get the additional topics covered but greater emphasis is placed on gaining a deeper understanding. This Course uses the Workbook Edvantage Interactive AP Chemistry 2. If you also took Chemistry 11 Honours one of the goals of both courses together is to

prepare you to write the AP (Advanced Placement) Exam in the middle of May. This 3 hour exam is equivalent to a 1st year University Chemistry Exam and will be scored on a 5 point scale. If you score a 5 (which correlates to approximately 80% on the exam) Canadian Universities will recognize the score and you can be given credit for 1st year University Chemistry. If you are planning on studying at an American University an AP score of 4 or 5 will get you 1st year University credit and save you some significant tuition.

Environmental Science 11 (MEVSC11) 4 credits

Prerequisite(s): MSC-10

Environmental Science 11 is a practical science course intended to help students investigate the environment they live in and begin to understand the challenges our Earth is facing. Students will examine complex relationships that exist in nature and how these are affected by natural forces and human practices. Emphasis will be on practical solution to environmental problems, as well as stewardship and restoration of ecosystems. Lab skills such as data collection and interpretation of data will be taught. The course will include in-class instruction, field work, and hands-on activities.

Life Sciences 11 (MLFSC11) 4 credits

Prerequisite(s): 60% or higher in MSC--10.

In this course, students will continue to develop the science curricular competencies while exploring three big ideas: 1. Life is a result of interactions at the molecular and cellular levels. 2. Evolution occurs at the population level. 3. Organisms are grouped based on common characteristics. The course takes students on an exploration of scope of life in all five kingdoms: Bacteria, Protista, Fungi, Plantae and Animalia. The course completion is a prerequisite for Anatomy and Physiology 12.

Physics 11 (MPH--11) 4 credits

Prerequisite(s): 67% or better in MSC--10 and MFMP-10

Co-requisite(s): Enrolled in MFOM-11 or MPREC11

Physics 11 is an introductory course that deals with the principles and theories of physics, encourages investigation of physical relationships, and illustrates the relationship between theory and application. Topics covered in this course include: kinematics, vector dynamics, work and energy, power and efficiency, electric circuits, properties of waves and sound. During this course, students will develop various problem solving skills and an ability to translate phenomena into algebraic expressions and graphical representations that can be manipulated.

NOTE: Scientific calculator, transparent ruler and graph paper are required.

Physics 12 (MPH--12) 4 credits

Prerequisite(s): 67% or better in MPH--11 and MFOM-11 or MPREC11

Co-requisite(s): Enrolled in MFOM-12 or MPREC12

Physics 12 is the study of classical mechanics and electromagnetism, and is designed to help students develop analytical and problem-solving skills required in areas of science and technology. This course is a more rigorous follow-up to Physics 11. Topics studied include: relative reference frames, static equilibrium, impulse and the conservation of momentum and energy, circular motion, gravitational fields, electric fields, magnetic fields and applications of magnetic induction. During this course, students will develop various problem solving skills and an ability to translate phenomena into algebraic expressions and graphical representations that can be manipulated.

NOTE: Scientific calculator, transparent ruler and graph paper required.

Specialized Science 12-Agriculture Stewardship (MSPSC12)

4 credits

Prerequisite(s): SC 10

This is a “hands-on” course in that students will be operating the Agriculture Initiative on MEI’s ALR land south of Downes Road. As part of the school-wide Ecological Stewardship Program, students in this course will be growing vegetables and flowers using sustainable methods in greenhouse and field crop environments. Students may also be assisting the Elementary and Middle Schools in their initiatives on this property. A secondary focus will include stream ecosystem restoration on the Downes Creek tributary on this land.

As a science course, the focus will be in the following areas:

1. Sustainable land use to meet humanity’s needs.
2. Understanding the sustainability, stewardship, and restoration of ecosystems.
3. Applying scientific knowledge to develop procedures, techniques, and technologies that have implications for places of employment.

Much of this course will be conducted outdoors and will involve practical work. It will run during the second semester.

NOTE: This course fulfills the grade 11 or 12 science requirement for graduation and for universities.

Second Language Education

Core French

Core French 9 (MFR--09)

Prerequisite(s): Core French 8

This one term course emphasizes the communicative approach. The text used is the series “Ça marche! 2”. French 9 explores the following themes: music, sports, adventures, community service, and the environment. There will be an emphasis on the relationship between French letter patterns and pronunciation. Students will learn to derive meaning from a variety of French

texts. Through short and simple conversations, students will demonstrate describing people, objects, places, and personal interests. Similarities and differences between students’ own cultural practices and traditions and those of Francophone communities in various regions will be explored.

NOTE: A good French/English dictionary (preferably Oxford or Collins Robert) is required.

Core French 10 (MFR--10) 4 credits

Prerequisite(s): MFR--09 (60% or better or permission from instructor)

This course is a continuation of the Ça Marche! program used in French 9. The program continues with Ça Marche! 3. This course uses an integrated approach, based on the principle that students should learn to communicate in French in class. Students and teacher increasingly communicate in French during the semester. Oral and written activities encourage communication about topics drawn from the experience of young people. The main thematic units are centered on clothing, family, Canada, and part-time jobs. They will learn how the interactions between First Peoples and Francophone communities have affected French language and culture in Canada. Students will learn and use Francophone cultural expressions. An intentional focus on the lives and contributions of Francophone Canadians and the importance of story in personal, family, and community identity.

NOTE: A good French/English dictionary (preferably Oxford or Collins Robert) is required. This course has a final assessment worth 20% of the final grade.

Core French 11 (MFR--11) 4 credits

Prerequisite(s): MFR--10 (60% or better)

French 11 continues to develop students’ competencies in the French language. Students will explore and interpret various texts in French. They will express themselves more fluently, both in spoken and written formats. Students will build their vocabulary and language skills, allowing them to ask and answer questions, respond to texts, narrate stories, and engage in conversations. Students will be able to communicate in the past, present, and future tenses. As students interact in different language contexts, they will learn to adjust their language and vocabulary. During class, students will tell anecdotes, share presentations, conduct interviews, perform dramatizations, and write a variety of texts. Students will look at various cultural aspects of French, including regional variations, cultural expression, and connections between French language and culture. They will learn how the interactions between First Peoples and Francophone communities have affected French language and culture in Canada. Students will engage with Francophone communities and people, bringing the language to life.

NOTE: A good French/English dictionary (preferably Oxford or Collins Robert) is required. This course has a final assessment worth 20% of the final grade.

Core French 12 (MFR--12) 4 credits

Prerequisite(s): MFR--11 (70% or better)

French 12 builds on language skills acquired in previous years, and allows students to communicate more proficiently in the language. Both teacher and students normally communicate in French. Students will discuss and justify opinions, share feelings and beliefs, and converse more confidently in French. As students' language skills progress, they will use a broader spectrum of vocabulary, idiomatic expressions, and present, past and future verb tenses. Students will explore cultural connections with French, including how diverse communities express themselves in French, how the language varies depending on the region, and how language and culture have been influenced by historical interactions. Students will engage with Francophone communities and people, bringing the language to life. During the course, students will also explore future opportunities for using French in personal, educational, and professional settings.

NOTE: A good French/English dictionary (preferably Oxford or Collins Robert) is required. This course has a final assessment worth 25% of the final grade.

Spanish

Spanish 9 (MSP--09) 2 credits

Prerequisite(s): none

This course begins the *En Español* program and uses the *En Español 1* textbook. Spanish 9 at MEI is a one-term course, which introduces students to the language. Students will begin to learn Spanish with an emphasis placed on asking and answering basic questions. Recognizing the relationships between pronunciations, letters, punctuation, including common intonation patterns and meaning is one of the main curricular competencies for this course. By the end of the course, students are expected to give a simple description of themselves, including activities they enjoy, their families, and their daily schedule in both spoken and written Spanish. Students will begin to communicate in the language through listening, speaking, reading and writing activities.

NOTE: Access to the internet through a device/computer with Wi-Fi capabilities will be beneficial to the student in class and required for completing assignments outside of class.

Spanish 10 (MSP--10) 4 credits

Prerequisite(s): MSP--09, (60% or better or permission from instructor)

This course continues the *En Español* program and uses the *En Español 1* textbook. Students continue their learning of the Spanish language and learn about Hispanic countries. Students explore some of the celebrations, challenges, cultural activities and points of interest in the Spanish world. This course helps students develop their skills in spoken, aural and written Spanish. Competency in basic conversational Spanish is an emphasis and students are encouraged to participate in the Mexico mission trip. By the end of the course, students are expected to communicate their thoughts and feelings in basic Spanish on a number of topics, including weather, sports, transportation, and daily

routines. Students work at each of the four language skills simultaneously through listening, speaking, reading and writing activities

NOTE: Access to the internet through a device/computer with Wi-Fi capabilities will be beneficial to the student in class and required for completing assignments outside of class. This course has a final assessment worth 20% of the final grade.

Spanish 11 (MSP--11) 4 credits

Prerequisite(s): MSP--10 (60% or better or permission from the instructor)

Spanish 11 continues to develop students' competencies in the Spanish language. Students will develop their ability to communicate their thoughts and feelings in Spanish on a number of topics, including school life, leisure time, activity preferences, and daily routines. The text used is *En Español 2*. Competency in basic conversational Spanish is emphasized, and one of the components will focus on Spanish as an outreach language, encouraging students to be involved in Missions to Hispanic people and their countries. Students work at each of the four language skills simultaneously through listening, speaking, reading and writing activities. They will expand their knowledge in the areas of conversation, culture, Hispanic music and vocabulary. They will develop in their use of other verb tenses such as the future and past. This helps students' proficiency in their conversational, reading and writing skills.

NOTE: Access to the internet through a device/computer with Wi-Fi capabilities will be beneficial to the student in class and required for completing assignments outside of class. This course has a final assessment worth 20% of the final grade.

Spanish 12 (MSP--12) 4 credits

Prerequisite(s): MSP--11 (70% or better or permission from instructor)

This course is a consolidation of previously acquired knowledge that allows students to communicate more proficiently in the Spanish language. By completing Spanish 12, students are able to omit Intro to Spanish at the university level. Therefore, students should be fully prepared to work diligently in Spanish class on a daily basis. Students will express themselves with growing fluency as they further develop the use of tenses such as present, past, future, conditional, and subjunctive. They will extend their vocabulary and improve their reading and writing levels in both speed and accuracy. Students will engage in experiences with Hispanic people and communities thereby improving their speaking and listening skills. Students will explore educational, personal, and professional opportunities requiring proficiency in Spanish.

NOTE: Access to the internet through a device/computer with Wi-Fi capabilities will be beneficial to the student in class and required for completing assignments outside of class. This course has a final assessment worth 25% of the final grade.

Social Studies Education

The main goal of Social Studies is to develop thoughtful, responsible, active citizens who are able to acquire the requisite information needed to consider multiple perspectives and to make reasoned judgments. The Social Studies curriculum provides students with opportunities to reflect critically upon events and issues in order to examine the present, make connections to the past, and consider the future. Through their participation in Social Studies, students are encouraged to understand and prepare to exercise their roles, rights and responsibilities within the family, the community, Canada and the world; to develop an appreciation for democracy and what it means to be a Canadian; to demonstrate respect for human equality and cultural diversity; and to think critically, evaluate information, and practice effective communication.

Students in Social Studies will develop the following skills: Learning how to gather and analyze information, communicate effectively, evaluate significance, use and assess primary and secondary sources, understand geography's effects on human behaviour, appreciate multiple perspectives, recognize continuity and change, observe cause and consequences, and make reasoned ethical judgements.

Social Studies 9 (MSS--09)

Prerequisite(s): SS 08

This course will cover the following content for the time period 1750 to 1919: Social, economic, political, and technological revolutions. The effects of colonialism and imperialism on indigenous peoples throughout the world. Global demographic shifts in population. Nationalism and the growth of modern nation states, including Canada. Local, regional, and global conflicts. Investigations into discriminatory actions and attitudes, and historical wrongs. Physiographic regions of Canada and geologic processes. This content will be the material used to develop these competencies in students: Assessing the significance of events from a variety of historical perspectives. Researching and assessing the evidence and sources for competing historical perspectives. Comparing and contrasting continuity and change through this time period. Assessing how specific conditions and actions of individuals affect history and geography. Recognizing ethical judgements in various sources. Making reasoned ethical judgements on controversial topics and events.

NOTE: Textbooks provided: Crossroads: A Meeting of Nations (Pearson Education, 2013) and Horizons: Canada's Emerging Identity (Pearson Education, 2009)

Social Studies 10 (MSS--10) 4 credits

Prerequisite(s): Successful completion of SS--09

Social Studies 10 will focus on developing various skills such as understanding significance, evaluating evidence, recognizing and using various perspectives, discovering continuity and change, making reasoned ethical judgements, and linking cause and consequences. The content used for developing these skills will range from the functions of the Canadian government, to

Canada's historic role in the twentieth century (1914 to the present), to world geographical issues like population, standard of living and environmental issues. There will be a final exam worth 20%.

NOTE: Textbook provided: Counterpoints: Exploring Canadian Issues (Prentice-Hall, 2010).

20th Century World History 12 (MWH--12) 4 credits

Prerequisite(s): 73% in MSS--10 for students in Grade 11; 67% in MSS--10 for students in grade 12.

This course focuses on the major events, people, and forces that shaped the most dynamic century in world history. The areas of focus will include the following:

1. Civil conflicts, revolutions, and independence movements – from the Russian Revolutions to Vietnamese independence
2. Authoritarian regimes – Mussolini, Stalin, Hitler, Mao, etc.
3. Global Conflicts like World Wars I and II, and the Cold War
4. International Cooperation and Organizations
5. Ethnic and cultural conflicts, along with civil rights movements
6. Social, cultural, and migration trends
7. Transportation and communication developments

This academic course will develop communication skills, including defending a thesis; along with other historical inquiry skills like identifying the role of perspective in assessing historical significance, evaluating evidence, understanding cause and consequence, identifying continuity and change, and making reasoned ethical judgements.

There will be a final exam worth 25%.

NOTE: Textbook provided: Global Forces in the Twentieth Century and a student workbook.

BC First Peoples 12 (MBCFP--12) 4 credits

Prerequisite(s): MSS – 10

This course covers the following content: traditional territories of the B.C. First Nations and relationships with the land; role of oral tradition for B.C. First Peoples; impact of historical exchanges of ideas, practices, and materials among local B.C. First Peoples and with non-indigenous peoples; provincial and federal government policies and practices that have affected, and continue to affect; the responses of B.C. First Peoples to colonialism, role and significance of media in challenging and supporting the continuity of culture, language, and self-determination of B.C. First Peoples; commonalities and differences between governance systems of traditional and contemporary B.C. First Peoples; contemporary challenges facing B.C. First Peoples, including legacies of colonialism.

Law Studies 12 (MLST-12) 4 credits

Prerequisite(s): 67% in MSS--10 for students in Grade 11; Completion of MSS--10 for students in grade 12.

This course attempts to provide students with a basic understanding of their legal rights and responsibilities so that they

are able to participate fully in Canada's democratic society. By understanding how laws are created and interpreted, students will be able to identify what influences these changes and how they evolve. At the end of this course, students should be able to recognize that our current legal framework in Canada will affect and impact their everyday lives. Areas of focus include: history of law, structure of Canada's justice system, different types of law, First People's legal orders and traditions, Canada's correction system and discussion of global legal agencies. This course includes guest speakers such as police officers, lawyers, and judges. It also includes a trip to the law courts and concludes with our very own mock trial. Law 12 final exam will be a mock trial worth 25% of the final mark.

NOTE: Textbook provided: All About Law – 6th Edition (Nelson, 2010). Additional cost of \$10 for a field trip. This course has a final exam.

Physical Geography 12 (MPGEO12) 4 credits

Prerequisite(s): 67% in MSS--10 for students in Grade 11; 60% in MSS--10 for students in grade 12.

Physical Geography 12 focuses on the processes and features of the natural world and how humans interact with God's good creation. Areas of study include:

1. Using geographic data and inquiry skills, such as cartography, to analyze evidence and interpret.
2. Assessing gradational forces that shape the earth and affect humanity – glaciation, rivers, coastal, weathering, hydrology, etc.
3. Developing knowledge of meteorology (weather) and its effect on climate.
4. Biome Regions – climate, vegetation, and soil.
5. Sustainable resource use and effects on the land, atmosphere, and hydrosphere.

Essential skills will include analyzing evidence and interpreting, assessing the significance of place, identifying patterns and trends, assessing geographical importance and interactions between the spheres, and making geographical value judgements.

As much as possible, the areas of study will be coupled with fieldtrips to bring life to academic knowledge. This will include an optional 3-day fieldtrip to the coasts of Washington and Oregon. There will be a final exam worth 25%.

NOTE: Textbooks provided: Earth Dynamics and a student workbook. Additional costs for fieldtrips (usually \$10 -\$15).

BC POST SECONDARY ADMISSION REQUIREMENTS

The BC Ministry of Education has transitioned to the new graduation program. Consequently, post-secondary institutions (PSIs) have changed or are revising their admission requirements accordingly. It is therefore advisable for students and their parents to consult the PSI websites where the most current information is available. MEI Student services guidance counsellors are also available to guide in this process. The links below will get you as close as it can to where the information can be found. Students should not hesitate to contact a college or university advisor if any questions arise.

IMPORTANT: There are usually two types of admission requirements: The first requirements are **General**, which indicate the basic criteria of admission that students need to have achieved in order to apply to that particular university. The second requirements are **Program Specific**, which indicate the specific courses, or academic standing, or credential, a student must achieve in order to apply for a specific program at that university. The hyperlinks below will guide you to the general admission requirements. Each post-secondary institutions identify their requirements differently. It is up to students to navigate carefully through this information so that they can plan their courses, credentials and extra-curricular involvements accordingly in high school and beyond.

SCHOLARSHIP AND BURSARY AWARDS

BC Achievement Scholarships

The BC Achievement Scholarship is a \$1250 award that recognizes the top 8000 graduates in the province. The Ministry of Education will determine recipients based on achievement in Grades 10, 11 and 12. More information is available [here](#).

BC Excellence Scholarship

The BC Excellence Scholarship is a \$5000 award recognizing 55 well-rounded graduates demonstrating community service and

leadership, both inside and outside of their school, as well as commitment and aptitude for their chosen career paths. Each school may nominate one student for this award. Additional information is available [here](#).

Pathway to Teacher Education Scholarship

The Pathway to Teacher Education Scholarship is a \$5,000 annual scholarship that recognizes 20 outstanding Grade 12 students planning to enter the field of teaching. Additional information is available [here](#).

District Authority Scholarship ~ Fraser Valley

The District Authority Scholarship is a \$1250 award intended for students who have excelled in grade 11 and 12 courses in one of the following specialty areas:

- Applied Skills (e.g. Business Ed., Tech. Ed., Home Ec.)
- Community Service (Volunteer, Leadership)
- Fine Arts (e.g. Visual Arts, Dance, Drama, Music)
- Indigenous Languages & Culture
- Physical Activity
- Second Languages
- Technical & Trades Training

Additional information is available [here](#) and through Student Services.

Abbotsford Community Foundation Awards

Abbotsford Community Foundation Awards are available to MEI and Abbotsford School District #34 secondary school students. Criteria for these awards may include one or more of the following: high academic achievement, school/community involvement, leadership involvement, good citizenship, financial need and/or pursuing specific post-secondary studies. Students will receive information about these awards in early February, with applications due by the end of February. More information is available [here](#).

MEI Friends & Alumni Awards

MEI Friends & Alumni Awards are available to MEI students. Criteria for these awards may include one or more of the following: high academic achievement, involvement in specific MEI courses, school/community involvement/service, leadership involvement, good citizenship, financial need and/or pursuing

specific post-secondary studies. Students will receive information about these awards in early January, with applications due by the end of February. More information is available [here](#).

Other Scholarship and Bursary Awards

Student Services will receive award related information throughout the year from various businesses, organizations and post-secondary institutions. Students are encouraged to check the GRAD bulletin board, the MEI Grad Newsletters (usually posted in September, November, January and March) and the MEI Student Services Grads 2022 Schoology Group posts.

Application Process

Grade 12 students interested in applying for scholarship & bursary awards are encouraged to initiate the application process in September to ensure that their award application packages arrive at the specific organizations, businesses, and post-secondary institutions etc. by the application deadlines.

Specific donors select the majority of scholarship & bursary award recipients, however, the MEI Grade 12 Awards Committee is also involved in selecting award recipients for some awards.
